

Professional Services Overview

At Patriot Technologies, our mission is to be the trusted partner that bridges the gap between IT security requirements and practical implementation. Our approach is to understand our customers' risks and operational requirements so that we can provide the appropriate security solutions to ensure the confidentiality, integrity, and availability of their assets.

Since 1996, Patriot has been focused on the IT security industry. When our clients turn to Patriot for their professional services fulfillment, they are leveraging Patriot's expertise, scalability, and proven past performance.

Our focus on security, business flexibility, and strong alliances within the security industry, have made us a leader in delivering solutions that satisfy short-term needs and long-term goals. Through skills transfer and knowledge management our customers can optimize their technology investments and are equipped to take a proactive approach to risk management.

Patriot's security solutions are proven to provide a return on investment, rather than merely a bottom-line expense. Our goal is to ensure your security strategies are aligned with business objectives and risks across the enterprise. Patriot will work with you to transition security investments, when appropriate, from capital to operational expenditures—reducing costs and improving financial statements.

IT security is not a static undertaking. Environment, product, process, and results need to be continually evaluated in order to ensure the security solution becomes part of daily operations. To that end, Patriot offers a comprehensive suite of services in the following areas:

- Vulnerability Assessment
- Risk Assessment
- Penetration Testing
- Continuous Monitoring
- Security Integration & Optimization
- Security Compliance
- Security Threat Modeling
- Security-centric Staff Augmentation
- Specialty Practices (Mobile, Cloud, Compliance)

Patriot's professional services are led by our Engagement Managers who will match each client with the most appropriate subject matter expert that is highly experienced and industry-certified.

Patriot recognizes that you have a choice when it comes to selecting a professional services partner. To that end, Patriot makes it a priority to deliver the results you need. Ultimately, as a result of choosing our professional services, our customers:

- Achieve a proactive approach to managing risk
- Improve ROI through strategic optimization and reduced complexity
- Benefit from a proven track record of scalability and flexibility with large enterprise engagements
