Schedule Status	Approved
·	
Agency or Establishment	General Services Administration
Record Group / Scheduling Group	Records of the Public Buildings Service
Records Schedule applies to	Agency-wide
Schedule Subject	Public Building Service Records
Internal agency concurrences will be provided	Νο
Background Information	This schedule covers records created and managed by program offices within the Public Buildings Service (PBS) of the General Services Administration (GSA). The PBS is responsible for acquiring space on behalf of the federal government through new construction and leasing, and acting as a caretaker for federal properties across the country, including the preservation of historic properties. This records control schedule covers records which include all
	federally owned and commercially-leased real properties as they relate to acquisition, construction, maintenance, and disposal; operations, services, and leasing; as well as PBS program management records.
	This schedule updates and supersedes previously approved record schedule items for Record Group 121, Records of the Public Buildings Service, and records scheduled in Record Group 269, Records of the General Services Administration, specific to building and space management, and leasing.

Records Schedule Items

Sequence Number 121.1 - Real Property Records 1 The records included in this group include anything of a durable nature about GSA's inventory of properties (both developed and undeveloped, owned and leased) that would be used as a reference for informing future projects or decisions on construction, space modification, leasing, and disposal. These records have a long duration, with the cutoff being usually the life of the building; until the building is sold, transferred, disposed of, or all leases are concluded (in the case of leased properties). Records for active buildings are to be kept under the purview of GSA and only to be transferred as permanent records to NARA or destroyed (depending on the retention instructions) after the building or the leased space is discontinued. Examples of these records include information relating to property ownership, sale, and transmittal, arrangements made with entities outside the federal government regarding the property, significant improvements to the property (such as buildings and major modernization projects), environmental, safety, physical condition, value, and fire inspections and reports, and documents related to the disposal or transfer of the property and related records. 1.1 010 - Important Property Records Disposition Authority Number DAA-0121-2015-0001-0001 This series contains the records of federally-owned buildings used to document ownership, property acquisition and final disposal, and are retained for historical and legal purposes. These records include titles, deeds, acquisitions and property transfer documents, photographs, documents related to historic building status and preservation, property related hazardous operations records, safety controls, permits, and related records. **Final Disposition** Permanent Item Status Active Is this item media neutral? 121.1 Real Property Records				The records included in this group include anything of a durable nature about GSA's inventory of properties (both developed and undeveloped, owned and leased) that would be used as a reference for informing future projects or decisions on construction, space modification, leasing, and disposal. These records have a long duration, with the cutoff being usually the life of the building; until the building is sold, transferred, disposed of, or all leases are concluded (in the case of leased properties). Records for active buildings are to be kept under the purview of GSA and only to be transferred as permanent records to NARA or destroyed (depending on the retention instructions) after the building or the leased space is discontinued. Examples of these records include information relating to property ownership, sale, and transmittal, arrangements made with entities outside the federal government regarding the property, significant improvements to the property (such as buildings and major modernization projects), environmantal, safety, physical condition, value, and fire inspections and reports, and documents related to the disposal or transfer of the property and related records.
