Successful Research Requires

- Careful logical reasoning and analysis
- Understanding
 - the records
 - the purpose of the records
 - the context in which the records were created
- "A reasonably exhaustive search for all relevant records"

And yet....

Billions of records that are NOT online

- Federal Government
- State Government
- Local Government
- Private Organizations
- The KEY to solving brick wall problems may be in records that are not online

- Think outside the box
 - Beyond Census and Vital Records
 - Beyond "Online"
- Cite Your Sources Fully
 - "1900 census" is not useful
 - "John A. Adams household, Harrison Twp., Knox Co., Indiana, E.D. 1, Sheet 1A, Family 1, 1900 Census" tells you exactly where the information came from

- Research Collateral Lines
 - Records about other family members may have the information you need
 - Help you work around brick walls

- Never Ignore Friends, Neighbors, and Associations (FANs)
 - People migrated with their FANs to new locations
 - People migrated to new locations because FANs were already there
 - FANs may be relatives

IMELINE

- Understand the Geography
 - Lots of maps online at various websites
 - Catalog.archives.gov

Keep a Research Log

- (1) What you looked at and found something in
- (2) What you looked at and didn't find something in
- Why?
 - Don't repeat yourself
 - Negative evidence is as useful (although more frustrating) as positive evidence
 - Keep yourself focused

Keep a Research Log

Interview Your Relatives

- Parents, grandparents, aunts, uncles, cousins....
- They may know names, dates, places, family stories.
- They may have "old family records" pertinent to your ancestors.
- Stories, family traditions, "life in the olden days"

Starting points

Collect basic facts

- Names of ancestors, their siblings, other relatives
- Dates of birth, marriage, death, divorce
- Places of birth, marriage, death, divorce
- Occupation
- Military service
- Other biographical details

Linking it all Together

Name plus some additional fact that links him or her to a specific geographic location or event on a specific date.

AND the source of that information.

Name by itself is not enough.

Doing Research in Archival Records: The "misspelled name"

- The name may not be spelled as you expect to find it.
 - The "ear" test:
 - What did the census taker (or other record keeper think was said?
 - Probably didn't ask how it was spelled.

Took me 30 years to find him ... using evidence from other records.

- Start with 1940 and work backwards
- Find everyone in the entire extended family in every census
 - To get a complete picture of the family
 - Work yourself around brick walls
- Indexes (computer or in book form) have mistakes.

- What do you do when you "can't" find the person using an index?
 - Try spelling the name a different way
 - Use "brute force" -- If you know where the person lived, read the microfilm for that town/township/village/district, etc., page by page, line by line.

- Census is arranged geographically
 - By state
 - Then by county
 - Then by local jurisdiction

- 1870–1940: Every person listed by name
 - Name
 - Age & gender
 - Race
 - Marital Status
 - Occupation
 - Birthplace
 - 1880-1930: birthplace of parents
 - & more

- 1850–1860: Every free person listed by name
 - Name
 - Age & gender
 - Race
 - Marital status
 - Occupation
 - Birthplace

- 1850–1860 Slave Schedules
 - Name of slave owner
 - List of slaves by age and gender: few names

- 1790–1840: Name of head of household
 - All household members listed by gender and age categories: no names
 - Slave would be part of master's household

Sample Search: Joe Washington Family –1890

Sorry. Almost no census. Most destroyed due to 1921 fire in Commerce Department Building.

Very little remains.

Sample Search: Joe Washington Family – 1880

- With the information I had, I tried online indexes, but did not find him. He must be on the census somewhere. Strategies:
 - Use the Alabama soundex (microfilm index)
 - Search Autauga County line by line.
 - May be in a different county.
 - Have to use other records to find parents & origins, or siblings....

Sample Search: Joe Washington – now back to 1880

Issues:

- He should be a son in someone's household.
- Age range is variable based on later censuses:
- 1880: Age? somewhere between 5 and 13
- 1900: Age 30 (Sept. 1869)
- 1910: Age 36 (1874)
- 1920: Age 45 (1875)
- 1930: Age 63 (1867)
