

Access to Archival Databases (AAD)

www.archives.gov/aad

The Access to Archival Databases (AAD) resource provides online access to a selection of NARA's electronic records from archival databases. AAD includes over 60 archival series created by about 30 federal agencies and 4 donors.

NARA selected series for AAD that identify specific persons, events, geographic areas, organizations, activities, messages, or that are indexes to other records. AAD does not support quantitative or statistical analysis of data.

From the AAD homepage, you can select a category or subject and learn about the AAD electronic records series related to it. You can conduct a free-text search for records or select one of the files in the series for fielded searching.

AAD retrieves the records that match the search criteria and displays some of the data in them. You may then view the full data records of interest and print them on your local printer, or download the retrieved records to your own computer.
