E.O. 13526, SECTION 5.3(b)(3)
ISCAP No. 2005-024, document 2

NATIONAL SECURITY INFORMATION
Unauthorized Disclosure Subject to Criminal Sanctions
THE PRESIDENT'S DAILY BRIEF
18 DECEMBER 1968

Portion identified as unresponsive to appeal
6. Soviet Union

The Soviets' first solid propellant intercontinental ballistic missile—the SS-13—probably will be operational in about six months. There are indications that testing is entering an advanced stage, and satellite photography shows that the first of the new single silos being built for it will be complete by early 1969. Only 31 of the new silos have been detected since construction began in mid-1967—a much slower deployment rate than noted in earlier Soviet intercontinental ballistic missile programs.
