Subject: Rightfully Hers march images
Attachments: RH lenticular mock-up.pdf

Susan,

During one of our first presentations to AOTUS on *Rightfully Hers*, we showed him a proposed melded photograph of two women's marches - one from 1913 for suffrage and the other from January 2021.

The Archivist liked it as long as we took a careful look at the 2021 march photo. I've attached a more recent mock-up. It would be a lenticular photograph that changes from one image to the other as you walk past. It's difficult to represent this on a computer screen, but it will give you a sense of the end product.

The proposal is to have this in the elevator lobby outside the gallery.

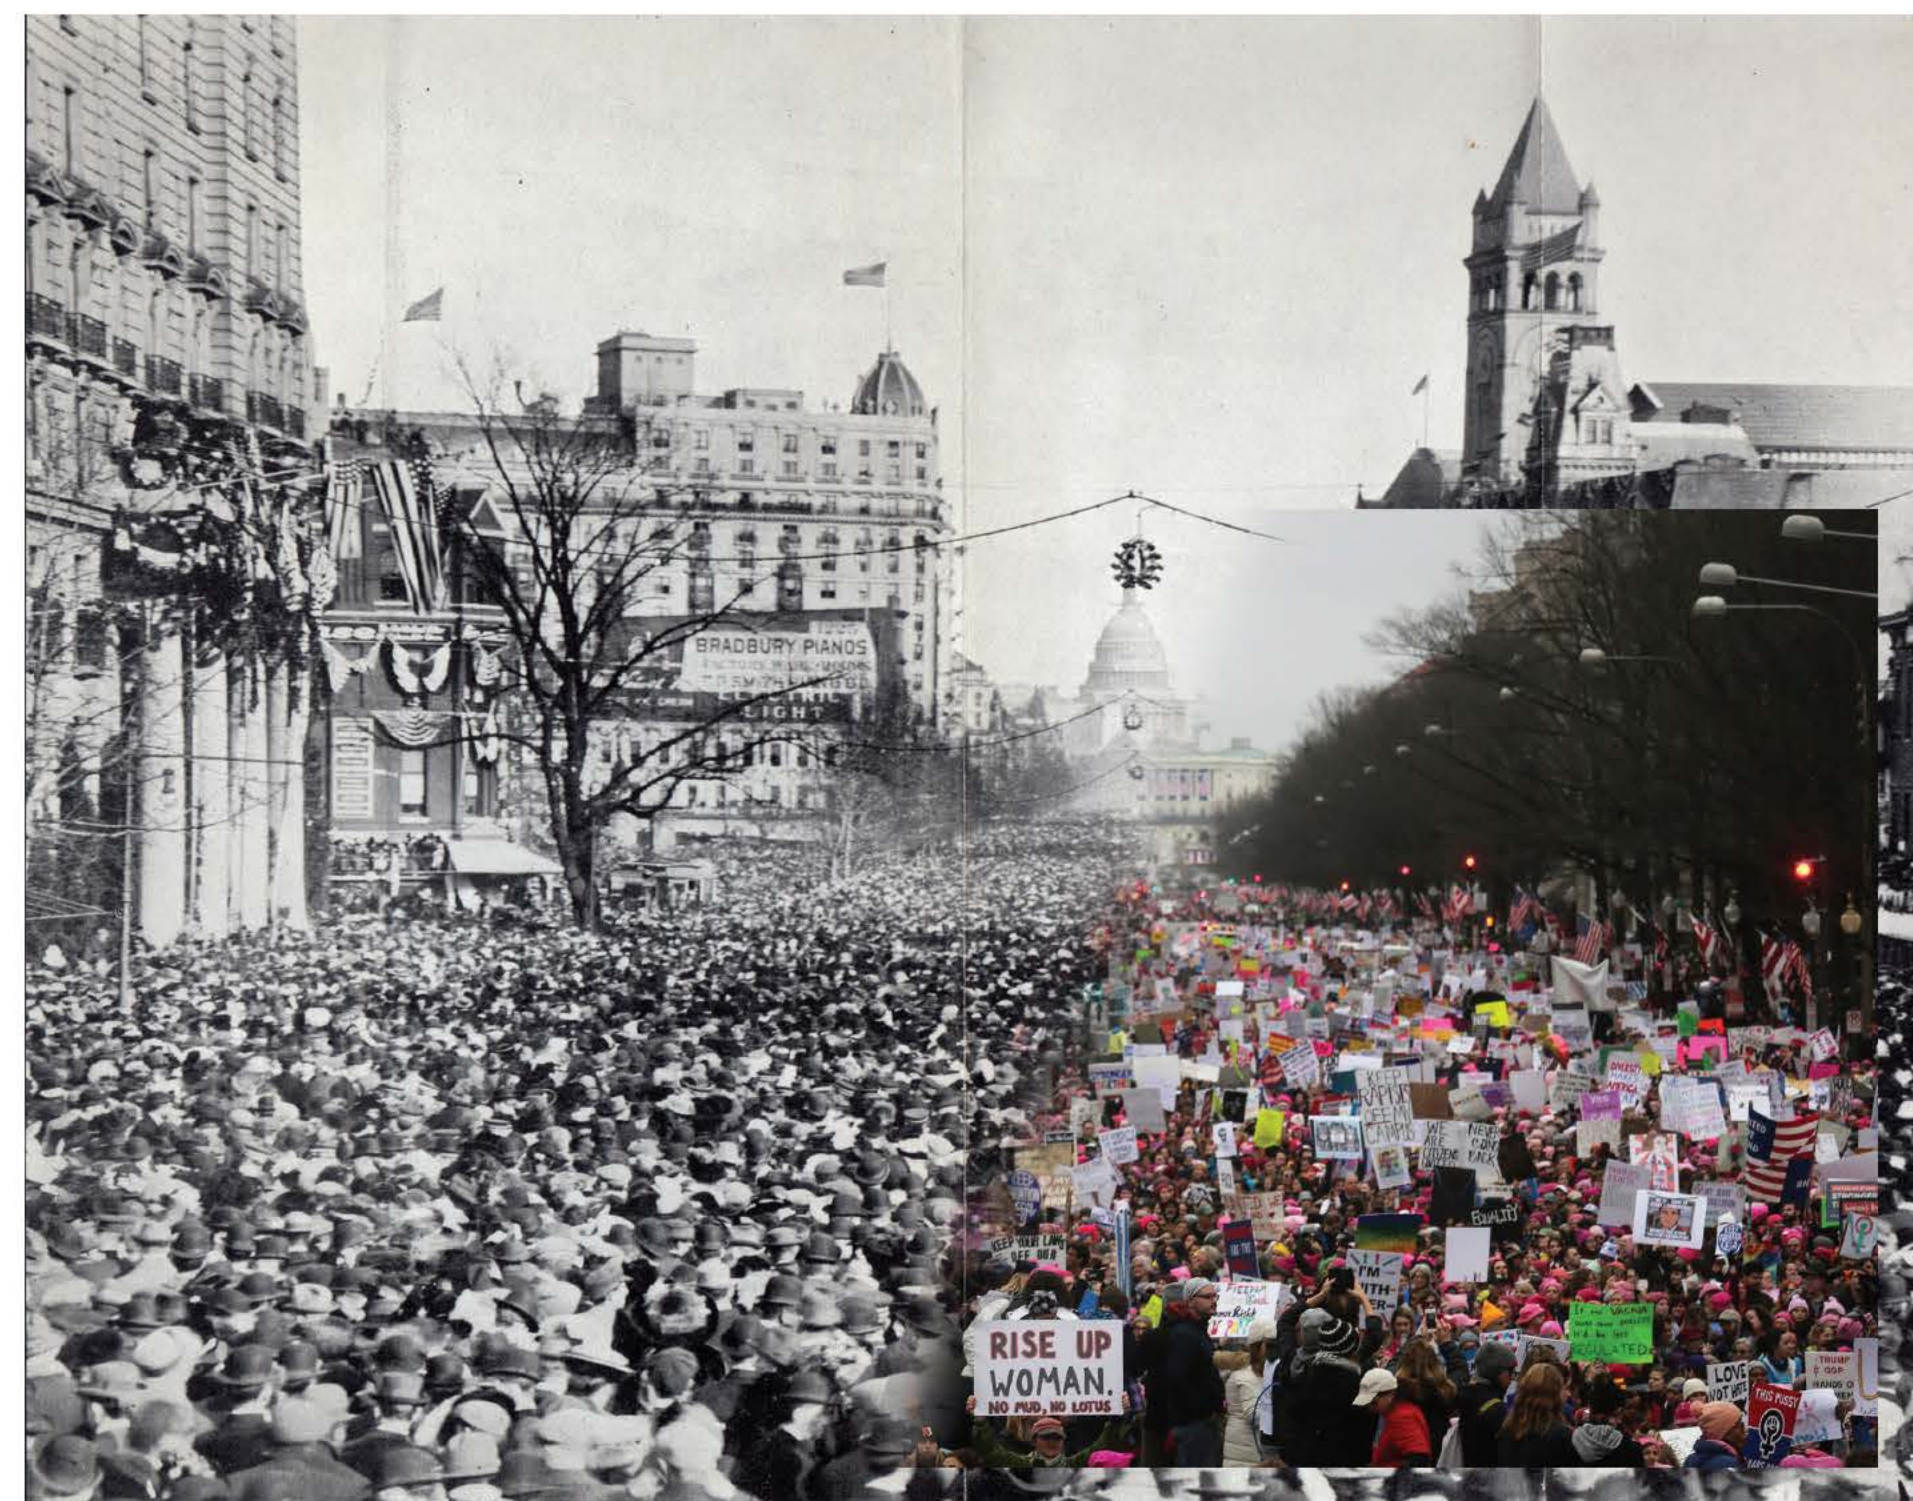

The Foundation has expressed an interest in producing some products based on this lenticular image. I wanted to keep you informed.

Michael
