The above represents the real market value of the property taken at the time and place stated.

The said property was taken under the following circumstances: _____

When I came to Canada Alamosa to live, I knew that the Apache Indians had their reservation in the vicinity but I did not expect them to go on the warpath, kill and steal all what they came across, because when we first came, they were friendly and seemed good natured. I April 1880, Victorio was on the height of his atrocities, he came with his tribe composed of 2 or 300 bucks & Squaws and stole or killed my cattle and stock as above described. I was glad to save my life and kept as far possible from the Indians. We pursued the Indians when they were in small bands and had a chance to get our stock back again. We recovered often stock which we lost again a few days later. When finally the Apaches were vanquished and removed from the Territory we were nearly all ruined and placed on the same level.

I have never recovered, or received any recompense for, any of said property except as above set forth.
