What Derivative Classification Is

“Derivative classification” means the incorporating, paraphrasing, restating, or generating in new form information that is already classified, and marking the newly developed material consistent with the classification markings that apply to the source information.

“Derivative classification” includes the classification of information based on classification guidance.

Derivative classifiers do not need to possess original classification authority.

What Derivative Classification Is Not

“Derivative classification” is not the duplication or reproduction of existing classified information.

Training Requirements

Persons who apply derivative classification markings (create derivatively classified documents) shall receive training at least once every 2 years.

The training shall consist of (at a minimum):

- The proper application of the derivative classification principles of E.O. 13526

Training Requirements

Persons who apply derivative classification markings (create derivatively classified documents) shall receive training at least once every 2 years.

The training shall consist of (at a minimum):

- The proper application of the derivative classification principles of E.O. 13526
- Emphasis on avoiding over-classification
 - Reducing Over-Classification Act
