Dear agents of the United States, In a move that proves the OGIS disregards and undermines *44 USC 1505(a)(3)*, *5 USC 552(a)(1)* and *5 USC Appendix-FACA 10(a)(2)* and *41 CFR 102-3.150(a)(4)*, the CIO of the OGIS has published on an internet domain that does **not** indicate sponsorship by the United States and is **not** even listed on *catalog.data.gov* or registered with **VeriSign** (GSA's registrar) per *nic.gov* (*dotgov.gov*) that the public shall, in order to attend the first meeting of the FOIA Advisory Committee (FOIAAC), be forced to succumb to an "Eventbrite" registration process (see <https://ogis.archives.gov/foia-advisory-committee/Meetings.htm>) that not only is **not** published as a notice in the Federal Register but has also **not** been codified by the GSA under *Part 102-3 of Title 41 of the CFR* or by the OGIS anywhere in the *CFR* (**OGIS, by the way, continues to function without having been codified as an organized and functioning Executive agency anywhere in the CFR**). Upon searching the YAHOO search engine for more information regarding "Eventbrite", I discovered it has been registered under the **non-Federal government** domain "*eventbrite.com*" (see <http://www.eventbrite.com/e/freedom-of-information-act-foia-advisory-committee-meeting-registration-11907366253>). It sure is assuring to know that the malfeasant OGIS interprets the *5 USC Appendix-FACA* and *Part 102-3 of Title 41 of the CFR* to mean it shall subject the public to an **un-keyed** and **unregulated** meeting registration game via a **non-Federal** entity. Please note that, just 14 days before the scheduled meeting, still clandestine are the identities and biographies of the members of the FOIAAC. Sincerely, Brady Eames
