Pre-Federal Maps in the National Archives: an Annotated List

Compiled by Patrick D. McLaughlin
Foreword

The General Services Administration, through the National Archives and Records Service, is responsible for administering the permanently valuable noncurrent records of the Federal Government. These archival holdings, now amounting to more than 1 million cubic feet, date from the days of the First Continental Congress and consist of the basic records of the legislative, judicial, and executive branches of our Government. The Presidential libraries of Herbert Hoover, Franklin D. Roosevelt, Harry S. Truman, Dwight D. Eisenhower, John F. Kennedy, and Lyndon B. Johnson contain the papers of those Presidents and many of their associates in office. These resources document significant events in our Nation's history and are preserved because of their continuing practical use in the ordinary processes of government, for the protection of private rights, and for the research use of scholars and students.

To facilitate the use of these materials, our archivists prepare various kinds of finding aids that describe their nature and contents. The present work is one such publication. We believe that it will be of value to anyone who wishes to use the records it describes.
Preface

Special lists are published by the National Archives and Records Service (NARS) as part of its records description program. The special list describes in detail the contents of certain important records series; that is, units of records of the same form or that deal with the same subject or activity or that are arranged serially. Its form and style are not fixed but vary according to the nature of the records to which it relates. Its distinguishing characteristic is that it goes beyond the general description contained in a record group registration statement, a preliminary inventory, or an inventory and describes records in terms of individual record items.

In addition to lists and other finding aids that relate to particular record groups, NARS issues publications that give an overall picture of materials in its custody. A new, comprehensive Guide to the National Archives of the United States and a revised and expanded Guide to Materials on Latin America in the National Archives of the United States were published in 1974. Reference information papers analyze records in the National Archives of the United States (hereafter called the Archives) on such subjects as transportation, small business, and the Middle East. Records of the Civil War are described in Guide to Federal Archives Relating to the Civil War (1962), Guide to the Archives of the Government of the Confederate States of America (1968), and Civil War Maps in the National Archives (1964); those of World War I in Handbook of Federal World War Agencies and Their Records, 1917-1921 (1943); and those of World War II in the two-volume guide Federal Records of World War II (1950-51). Genealogical records are described in Guide to Genealogical Records in the National Archives (1964). In the Archives are large quantities of audiovisual materials received from all sources: Government, private, and commercial. The Guide to the Ford Film Collection in the National Archives (1970) describes one of the largest private gift collections. The extensive body of maps and charts is described in the Guide to Cartographic Records in the National Archives (1971).

Many bodies of records of high research value have been microfilmed by NARS as a form of publication. Positive prints of these microfilm publications, many of which are described in the current Catalog of National Archives Microfilm Publications, are available for purchase. For other publications, see the most recent Select List of Publications of the National Archives and Records Service, General Information Leaflet No. 3.

Introduction

A basic function of the National Archives and Records Service (NARS) is to maintain the permanently valuable noncurrent records of the Federal Government. By implication these records should be dated after 1787, but in fact a significant amount of material from the pre-Federal period of American history is also among NARS holdings, including a number of early maps.

Most of the relatively accurate maps and charts of areas in North America at the time of the American Revolution had been compiled by the British, largely in response to the needs of commercial navigation and the requirements of the long series of military campaigns conducted against the French during the 17th and 18th centuries in the struggle for mastery of the continent. Prominent among these documents were the coast charts of *The English Pilot*, a massive work compiled by various individuals and published in more than 30 editions during the period 1671-1784; the charts of *The Atlantic Neptune*, compiled under the direction of Joseph Frederick Wallet des Barres from 1763 to 1774 and published in 1779; Henry Popple's *Map of the British Empire in America*, published in 1733; and the numerous American atlases assembled and published during the late 18th century by Thomas Jefferys and his successor, William Faden, from the best available works by contemporary surveyors and cartographers of all nations.

Significant mapping was also accomplished before and during the Revolution by several native Americans and a number of Englishmen and other Europeans who had settled permanently in the Colonies. Some notable examples are Capt. Cyprian Southack's *The New England Coasting Pilot...*, 1719-33; the *Map of the most Inhabited Part of Virginia containing the whole Province of Maryland...* by Joshua Fry and Peter Jefferson, first published in 1754; Lewis Evans' *Map of the Middle British Colonies in North America*, 1755; John Mitchell's *A Map of the British and French dominions in North America...*, 1755 (which played an important role in the boundary negotiations between the United States and Great Britain following the Revolution); and the extensive military mapping executed during the war by General Washington's engineers under the direction of Thomas Hutchins, Robert Erskine, and Simeon DeWitt.

Copies of many of the maps cited above, either in the original printing or in facsimile form, are among the records in the custody of the Cartographic Archives Division of NARS. Much of this material was accumulated in the 19th century by the Army's Corps of Engineers and the Corps of Topographical Engineers (a separate unit in existence from 1838 to 1863) while they were exploring and mapping new territories; planning and surveying roads, canals, and other civil engineering works; and designing and constructing fortifications. These activities necessitated producing and accumulating cartographic aids in the form of maps, sketches, and construction drawings which are now filed with the Headquarters (or Civil Works) Map File and the Fortifications Map File in Record Group 77.

Other important early maps in this list were acquired by American diplomatic representatives during negotiations with Great Britain regarding the United States-Canadian boundary following the Revolution. For their own information and for use as evidence in support of U.S. claims, the American commissioners gathered copies of the best available maps covering areas in North America occupied by Canada and the newly independent United States. Some of these maps have survived and are now among Records of Boundary and Claims Commissions and Arbitrations, Record Group 76.
A third major group of maps described includes items filed among the papers in Records of the Continental and Confederation Congresses and the Constitutional Convention, Record Group 360. Particularly noteworthy are maps by Thomas Hutchins, Simeon DeWitt, and Bernard Romans. Also included in Papers of the Continental Congress (PCC), RG 360, are several undated plans of unidentified forts by unidentified compilers. These plans are not described in this list but are filed in PCC item 60 (p. 421, 423, 425, 427, 429, and 430) and item 157, volume I (p. 328).

The documents described in this special list include maps in the custody of NARS that can reasonably be identified as having originated during or before 1790, as being copies or facsimiles of maps from that period, or as later maps that portray areas or events during the period. The list describes many historically significant items that can, in a real sense, be considered the foundation upon which the vast Federal mapping program was subsequently built. Every new map draws heavily upon the concepts, data, and techniques established by its cartographic forebears, and the training of the early Federal mapmakers was grounded firmly in the French and British traditions of surveying and cartography.

The researcher in the history of American mapping in the colonial and Revolutionary periods will also find particularly rich resources available in the Geography and Map Division of the Library of Congress, the New-York Historical Society, the John Carter Brown Library at Brown University, the American Philosophical Society in Philadelphia, the William L. Clements Library at the University of Michigan, the Newberry Library in Chicago, and in various State and municipal depositories. In London, the Public Record Office and the map room of the British Museum also offer pertinent resources.

This list is divided into three parts. Part I lists the maps in five special atlases. The Faden and George Washington Bicentennial atlases are bound; the Wheeler, U.S. Constitution Sesquicentennial, and George Washington (Army War College) atlases are composed of loose sheets. Part II lists maps covering the entire United States or encompassing two or more Colonies or States, in chronological order. Part III contains maps relating to specific Colonies or States, listed alphabetically by name of State and thereunder chronologically. For convenience in indicating the geographical coverage of some sheets, reference has been made to the District of Columbia and States of the United States as they now exist.

Dates cited in the chronological sequences of parts II and III are, in most cases, dates the maps were compiled or published; a few items are listed under the date of an original survey or of an event depicted although the map, or an edition thereof, was published at a later date. Original titles, punctuation, and spelling have been retained, with three exceptions: superscript letters have not been used, the archaic letters "f" for "s" and "v" for "u" have not been used, and long titles have been shortened. Where several editions or variations of a map are listed consecutively, titles and other data for subsequent maps are the same as for the first map unless noted. Information enclosed in brackets has been supplied by the compiler.

The approximate scale of each item described is indicated if it can be determined from the map; dimensions, stated in inches, are from edge to edge, with the vertical dimension first. Compilation and publication data are provided in most cases on the maps themselves and are given as shown on the map. Insets and annotations are noted.
INTRODUCTION

Each map or series of maps is identified as part of either the Reference Collection in the Cartographic Archives Division or one of the following record groups:

Records of the Bureau of the Census, Record Group 29
Records of the Bureau of Land Management, Record Group 49
Records of the Bureau of Indian Affairs, Record Group 75
Records of Boundary and Claims Commissions and Arbirtrations, Record Group 76
Records of the Office of the Chief of Engineers, Record Group 77
Records of the National Park Service, Record Group 79
Records of the Office of the Quartermaster General, Record Group 92
Records of Minor Congressional Commissions, Record Group 148
Records of the War Department General and Special Staffs, Record Group 165
Records of the United States House of Representatives, Record Group 233
Records of the Supreme Court of the United States, Record Group 267
Records of the Continental and Confederation Congresses and the Constitutional Convention, Record Group 360

Individual file numbers are also indicated for most maps. The Records of the Office of the Chief of Engineers, Record Group 77, include three principal types of file numbers: an alpha-numeric designation for items from the Headquarters Map File, drawer and sheet numbers for items from the Fortifications Map File, and the letters WDMC followed by a geographical file number for items from the War Department Map Collection.

With the exception of a few items covered by copyright, photoreproductions of the maps described can be furnished for a fee. Requests for information should be addressed to the Cartographic Archives Division, National Archives (GSA), Washington, DC 20408.

This special list has been revised to include entries for 94 maps and charts not described in the 1971 edition. Five of the original entries were deleted as falling outside the chronological criteria of the list.

The compiler gratefully acknowledges the work of John Butler, George Chalou, Gary Morgan, and Howard Wehmann in locating the newly added maps and bringing them to his attention.

Part I. Atlases

U.S. CONSTITUTION
SEQUICENTENNIAL ATLAS

   During the period 1936-39 the Geological Survey printed a series of facsimiles of early maps of the United States and the Thirteen Original Colonies for distribution in atlas form by the U.S. Constitution Sesquicentennial Commission. These maps were drawn at varying scales. In the facsimile series, most maps were reduced considerably, and each was printed on a uniform 26- by 20-inch sheet. A set of the maps is filed in Records of Minor Congressional Commissions, Record Group 148.

   Listed below are the map titles as they appear on the 19 facsimile sheets, usually followed by shortened titles (appearing in quotations) of the original maps.

1(2). Delaware at the time of the Ratification of the Constitution, from a 1787 original in the Library of Congress at Washington. "This Map of the Peninsula Between Delaware and Chesapeake Bays ... by John Churchman."

1(6). Massachusetts (eastern part; i.e., the District of Maine) at the time of the Ratification of the Constitution, from original maps in the Library of Congress, Washington, including one based upon a Mitchell map owned and used by John Jay, first Chief Justice of the United States. "Extract from a Map of the British & French Dominions in North America by Jno. [John] Mitchell ... 1775." [Two insets.]

I(15). Virginia (eastern part, including West Virginia) at the time of the Ratification of the Constitution, from original 1787 and 1775 maps in the Library of Congress at Washington, one made by Thomas Jefferson, the other by his father [Peter Jefferson]. "A Map... of Virginia, Maryland, Delaware and Pennsylvania." [1787.] "A Map... of Virginia." [1775.]

I(17). The United States of America showing the boundaries fixed in 1782 five years before the Ratification of the Constitution, from a contemporary copy of Benjamin Franklin's red-line Mitchell map identified in Spain by the Library of Congress at Washington.

GEORGE WASHINGTON BICENTENNIAL ATLAS

In 1932 the George Washington Bicentennial Commission published an atlas containing 85 maps on 50 plates, "including twenty-eight made by George Washington, seven used and annotated by him, and forty-two new maps concerning his activities in peace and war and his place in history." Dimensions vary. A copy of this atlas is filed in Records of Minor Congressional Commissions, Record Group 148.

Listed below are titles and descriptions of the 85 maps as they appear on the 50 plates.

2(1). General map of George Washington's principal routes of travel, with insert map of his sea voyage to Barbados in 1751-2.

2(3). Mount Vernon. The River Farm in 1766 (upper); plan of Lawrence Washington's turnip field in 1748 (lower left); sketch of part of the estate near the Mansion House and Little Hunting Creek about 1747 (lower right). All three maps were made by George Washington.

2(5). Mount Vernon. The Union Farm (left); the field and stream near the Potomac River and Little Hunting Creek about 1747 (right). Both maps were made by George Washington.

2(6). Mount Vernon. Roads leading to the Ferry Landing in 1790 (upper); the "Chapel Land" between Accotink Creek and Piney Run (lower left); the roads from Mount Vernon to Pohick Church and to Cameron at some time after 1790 (lower right). All three maps were made by George Washington.

2(7). Mount Vernon. The Mansion House Grounds. The upper middle map is a facsimile of one made by George Washington about 1784. The other three maps were made by Samuel Vaughan in 1781, when he was
corresponding with Washington about the landscape gardening of the place.

2(8). Wakefield or Bridges Creek, Westmoreland County, Virginia, where George Washington was born. The upper map is thought to have been made by George Washington in 1747. The lower map is a modern one showing the locations of the birthplace and burial place in relation to Pope’s Creek, Bridges Creek, and the Potomac River.

2(9). Washington’s Boyhood Home. Part of Rappahannock Farm, or Ferry Farm, or Pine Grove. The words upon the map in George Washington’s handwriting are taken from his survey notes of September 13, 1771. The insert map shows the relation of the land mapped by Washington to Fredericksburg, Falmouth, Deep Run, and Little Falls Run [Va.].

2(10). Bath or Warm Springs, now Berkeley Springs, West Virginia, showing lots 58 and 59 upon which George Washington built a house; the indenture under which he bought the land. The map was not drawn by Washington.

2(11). George Washington’s sketch map of the country he traversed in 1753-4 between Cumberland, Maryland, and Fort LeBoeuf, near Waterford, Pennsylvania.

2(12). George Washington’s own maps of Fort Cumberland, now Cumberland, Maryland, made about 1758 (upper), and of Boston and Cambridge, Massachusetts, made about 1775 (lower).

2(13). Fort Loudoun at Winchester, Virginia, drawn by George Washington about 1756 (upper); his plan for a line of march in a forest country in 1758 (lower).

2(14). Robert Erskine’s map of New Jersey in 1777, delineated for the use of George Washington by him in sixteen places.

2(16). The attack upon Fort Mifflin [Pa.] on the Delaware River, October 9, 1777 (upper); the redoubts near Philadelphia in 1778 (lower), both maps annotated by George Washington.

2(17). Stony Point and Verplanck’s Point, New York, in 1779, annotated by George Washington (upper); Washington’s plan of the order of battle for 1781 (lower).

2(18). The left-hand map was drawn by George Washington from an account sent to him by General Edward Hand on March 31, 1779, and shows an area on the Susquehanna River in southern New York and northern Pennsylvania. The right-hand map is a modern one, showing localities where George Washington did surveying.

2(19). George Washington’s survey of the site of Belhaven (Alexandria), Virginia, about 1748 (upper); his plan of the town, believed to have been drawn a year later (lower).

2(20). Two simple land surveys made by George Washington on November 17, 1750 (left), and April 3, 1751 (right).

2(21). Two complex surveys, George Washington’s land on Four Mile Run, surveyed in April, 1799 (left); a tract on the Potomac near Pawpaw, West Virginia, surveyed in April, 1751 (right).

2(22). The Potomac River near Harpers Ferry [W. Va.] with George Washington’s comments on its navigability, 1754 (upper); a tract at the mouth of the Little Kanawha, West Virginia, 1773 (lower). Washington made the upper map and annotated the lower one.

2(23). George Washington’s own map of his lands on the Great Kanawha River, West Virginia, drawn from surveys by William Crawford, Samuel Lewis, and John Floyd, between 1771 and 1774. [Map on two pages.]

2(25). Parts of Maryland, Pennsylvania, and West Virginia, to illustrate plans for water transportation from the Atlantic seaboard to the Mississippi Valley. The upper map, attributed to George Washington, is here proved by his own annotation of the lower map to have been drawn by Norman Bruce in 1784.

2(27). New York State, showing in red the places visited by George Washington.

2(28). New Jersey, showing in red the places visited by George Washington.

2(30). Maryland and Delaware, showing in red the places visited by George Washington.

2(31). West Virginia and Ohio, showing in red the places visited by George Washington and the routes of his Ohio River journey in 1770, and his journey across West Virginia in 1784.

2(32). The region of the lower Potomac, showing in red Mount Vernon and the places visited by George Washington.

2(33). Virginia, showing in red the places visited by George Washington.

2(34). North Carolina, South Carolina, and Georgia, showing in red the places visited by George Washington; the insert map gives the route of his whole southern tour in 1791.

2(35). Washington's campaign with Braddock in 1755.

2(37). Washington's campaign in 1777 from Morristown to Valley Forge, via the highlands of the Hudson, the Brandywine, and Germantown [Pa.].

2(38). Washington's campaign in 1778 from Valley Forge to the Hudson via Monmouth Court House [N.J.].

2(39). Washington's campaign in 1781 from the Hudson to Yorktown.

2(40). John Trumbull's map of the siege of Boston, made at Washington's direction and sent by him to Congress (upper); a French map of the battle of Monmouth (lower).

2(41). Sebastian Bauman's map of the siege of Yorktown, dedicated to Washington.

2(42). Cambridge and Boston, Massachusetts, showing localities associated with George Washington.

2(43). New York City, showing localities associated with George Washington.

2(44). Newburgh and New Windsor, New York (upper right), Morristown, New Jersey (upper left), Philadelphia (lower), showing localities associated with George Washington.

2(45). Annapolis, Maryland (upper), and Alexandria, Virginia (lower), showing localities associated with George Washington.

2(46). Washington, D.C., showing localities associated with George Washington; insert map on right shows the Patowmack Company's canal and locks at Great Falls, Virginia, parts of which were constructed during the period when Washington was president of the company.

2(47). Fredericksburg, Virginia (upper), and Williamsburg, Virginia (lower), showing localities associated with George Washington.

2(48). The localities in New York, Pennsylvania, Ohio, Kentucky, West Virginia, the District of Columbia, Maryland, and Virginia where George Washington owned land.
2(49). The world, showing features named for and statues of George Washington outside of continental United States.

2(50). The United States of America, showing features named for George Washington, other than streets, buildings, schools, monuments, etc.

GEORGE WASHINGTON ATLAS
(ARMY WAR COLLEGE)

   A group of manuscript maps, apparently compiled in the early 1930's in the Historical Section of the Army War College, illustrating George Washington's travels and campaigns during the French and Indian War and the Revolutionary War. The group includes two separate series; they are identified for this listing as series A and series B but are given consecutive subnumbers under entry 3. Series B apparently was compiled in connection with the establishment of the Shenandoah National Park in Virginia.

Series A

3(1). Washington's Journey to Fort LeBoeuf, 1753.
   1 inch to 25 miles. 18 x 13.

3(2&3). The file does not include sheets numbered 2 and 3.

3(4). Untitled map of Boston and vicinity showing fortified lines.
   1 inch to 1 mile. 11½ x 13.

3(5). Untitled map of the lower Hudson River from New York City to Fort Washington.
   1 inch to approx. 1½ miles. 12½ x 5½.

3(6). Battle of Long Island, 1776.
   Shows positions and movements of the opposing forces. 1 inch to 1 mile. 11½ x 15.

3(7). Untitled panel of two maps of the battlefield at White Plains, N.Y.
   Map 1 shows the opposing forces on October 28, 1776; map 2 shows them on October 29, 1776. 1 inch to approx. 3,000 feet. 9 x 12.

3(8). Retreat Across New Jersey, 1776.
   Shows routes of Washington, Sullivan, and Lee from New York to Pennsylvania. 1 inch to approx. 12 miles. 14½ x 13.

3(9). Untitled map of the Delaware River in the vicinity of Trenton, N.J.
   Shows towns and roads in the area. 1 inch to approx. 2½ miles. 10 x 11.

3(10). Brandywine, [Pa.].
   Shows towns, roads, and movements of the opposing forces at the Battle of Brandywine. 1 inch to approx. 1 mile. 9¼ x 9½.

3(11). Germantown, [Pa.].
   Shows towns, roads, and the movements of the opposing forces at the Battle of Germantown. 1 inch to approx. ½ mile. 14 x 11.

3(12). Monmouth, [N.J.].
   Shows towns, roads, and movement of the opposing forces at the Battle of Monmouth Courthouse. 1 inch to approx. ½ mile. 9¼ x 11½.

3(13). Stony Point, [N.Y.], 1779.
   Shows fortified lines around Stony Point, and the movements of General Wayne's forces. Scale not given. 13 x 11.

   Shows fortified lines around Charleston and the location of the British camp. 1 inch to approx. 4,000 feet. 12 x 15.
3(15). Untitled map of the battlefield of Camden, S.C.
Shows positions and movements of the opposing forces. Scale not given. 9 × 9.

Shows movements of the forces of Tarleton, Cornwallis, and Lafayette.
1 inch to approx. 15 miles. 11 × 15.

3(17). Siege of Yorktown.
Shows roads, fortifications, and positions of the opposing forces around Yorktown and Gloucester Point, Va. 1 inch to approx. 2,000 feet. 13½ × 11½.

General outline map of the lower Hudson River Valley from New York City to West Point. 1 inch to 5 miles. 11 × 8½.

Series B

Shows towns, colonial forts, and modern roads in the northern half of the Shenandoah Valley. Scale not indicated. 13 × 8.

3(20). Sheet II. A continuation of sheet I.
Shows the same information for the southern half of the valley. Scale not indicated. 11 × 8.

3(21). Sketch No. 3. Washington’s Travels, Virginia, West Virginia and Maryland.
Shows colonial place names and routes in the region. Scale not indicated. 7 × 9½.

3(22). Sketch No. 4. Washington’s Travels in Northern Virginia.
Shows colonial place names and routes in the region and the extent of the proposed Shenandoah National Park. Scale not indicated. 12 × 15.

FADEN ATLAS OF THE AMERICAN REVOLUTION

During and shortly after the American Revolution the British publisher, William Faden, produced a series of maps illustrating the principal Revolutionary battles and campaigns. The sheets were assembled and published as an atlas in 1793. In 1845 the New York firm of Bartlett & Welford purchased the Faden sheets and again issued them in atlas form.

Among Records of the Office of the Chief of Engineers, Record Group 77, is a recently bound collection of the original published sheets, together with manuscript tracings based on two of them.

Listed below are the maps as they appear in the atlas, generally including topography, roads, and settlements in battle or campaign areas, and positions and movements of opposing forces.

1 inch to approx. 150 yards. 22 × 30.

4(2). A Plan of the Town of Boston, with the Intrenchments & c. of His Majesty’s Forces in 1775; from the Observations of Lieut. Page of His Majesty’s Corps of Engineers; and from the Plans of other Gentlemen.
1 inch to approx. 700 feet. 22 × 15.

4(3). Plan of the City and Environs of Quebec; with its Siege and Blockade by the Americans, from the 8th of December 1776 to the 13th of May 1776.
1 inch to 600 feet. 22 × 29.

4(4). A Plan of the Attack of Fort Sullivan, near Charles Town [Charleston] Carolina, by a Squadron of His Majesty’s Ships, on the 28th of June 1776, with the Disposition of the King’s Land Forces, and the Encampments...
and Entrenchments of the Rebels from the Drawings made on the spot.

1 inch to approx. 2,000 feet. 15 x 22.

Inset: “plan of Fort Sullivan.”

4(5). A [north by east] View of the Fort on the Western end of Sullivan’s Island with the Disposition of His Majesty’s Fleet Commanded by Commodore Sir Peter Parker ... during the Attack on the 28th of June 1776 which lasted 9 hours and 40 minutes.

Scale not indicated. 10 x 16.

4(5a). To Commodore Sir Peter Parker ... This View [of Sullivan’s Island] is Most humbly dedicated and Presented by Lt. Colonel Thos James ... July 1st 1776.

Scale not indicated. 9 x 23.

4(6). A Topographical Map of the Northn. Part of New York Island, Exhibiting the Plan of Fort Washington, now Fort Knyphausen, With the Rebels Lines to the Southward, which were forced by the Troops under the Command of the Rt. Honble. [Sir Hugh] Earl Percy on the 16th Novr. 1776 ...

1 inch to approx. 1,500 feet. 22 x 15.

1 inch to approx. 2 miles. 14½ x 22.

4(7a). A [northwest by north] View of Charles Town from on board the Bristol Commodore Sir Peter Parker ... taken in Five Fathom Hole the day after the Attack upon Fort Sullivan by the Commodore & his Squadron, which Action continued 9 hours & 40 minutes.

Scale not indicated. 10 x 12.
