Schedule Status Approved

Agency or Establishment Forest Service

Record Group / Scheduling Group Records of the Forest Service

Records Schedule applies to Agency-wide

Schedule Subject Accounting - Timber Sale and Associate Road Development Cost

Analysis

Internal agency concurrences will

be provided

No

Background Information

The Forest Service objectives are to establish and maintain an accounting system that provides full disclosure of financial results; A tool to assess management performance and stewardship; A system for internal control and accountability of funds, property, and other assets from acquisition to disposition; Administrative controls of obligations and expenditures; and Reliable accounting information for budget preparation, execution, and reporting that meets Federal accounting standards.

The Forest Service maintains an accounting system that complies with the U.S. Standard General Ledger (SGL). The SGL provides a uniform Chart of Accounts and technical guidance to be used in standardizing Federal agency accounting, which supports the preparation of standard external financial reports required by the central agencies (Office of Management and Budget, Treasury, and Government Accountability Office). The SGL is maintained by the Department of Treasury Financial Management Service.

Timber sales are used to achieve vegetation management objectives, including providing a sustainable yield of forest products to meet the nation's demands for wood fiber and restoring, improving, and maintaining forest ecosystem health. Timber sales are often used as a least-cost method to manage vegetation for improving wildlife habitats, reduce fuels that may increase fire risk, recover value from natural disasters, combat insect and disease infestations, and improve tree growth. Roads are generally required for timber harvest, although some timber sales can be harvested using helicopters or cable-yarding systems from existing roads. Each timber sale contract specifies the harvesting and logging method and any permanent or temporary road construction Final EA 47 January 2001 and

reconstruction required. The timber industry pays the construction cost for all logging roads and, if requested by the Forest Service, for the cost of road obliteration or decommissioning after a timber harvest is completed. Timber purchasers are also required to complete needed road reconstruction to ensure public safety and to protect the environment from logging traffic. Roads that the Forest Service determines are needed for future use are constructed to meet road specifications and retained for future use after the timber sale. Temporary roads are constructed only for the duration of the timber harvest and are intended to be eliminated after their use. Each fiscal year, the Forest Service estimates the amount of timber to be offered for sale at a given budget level. A timber sale generally requires several years of preparation, beginning with identification of the need until final sale offering. All decisions that include timber sales must meet all legal requirements, including those mandated by the National Forest Management Act (16 U.S.C. 1600 et seq.) and NEPA.

Associated FS-Mission specific records retention schedule items currently approved by NARA that are not included as part of this request: N1-95-10-10, items 93, 94, 101
