LABORATORY ANALYSIS AND TESTING

This category deals with all phases of sampling, testing, and analysis of:

1. veterinary biologics for purity, safety, potency, and efficiency, and to confirm the experimental data submitted by licensees in support of their requests to license new biological products;
2. various meat, blood, skin, and other samples to determine the occurrence of a specific animal disease;
3. meat, poultry, and their products to assure that they are free of disease and abnormality; are wholesome and sanitary; and that product ingredients accurately follow the formulation claimed;
4. fruit, water, and soil for environmental monitoring to determine pesticide levels that could be harmful to human and/or animals;
5. agricultural and vegetable seed sampling and examination for noxious weeds. A small percentage of the samples is also tested for purity and germination.
