Weather data collected by the Blue Hill Meteorological Observatory, Harvard University. These records are commonly referred to as the Blue Hill Collection. They consist of observations recorded by various meteorological instruments on charts, sheets, discs, graphs and film, e.g., Anemometer (wind speed), Anemoscope (wind direction), Barometer (atmospheric pressure), Hydrometer (specific gravities), Thermohydrograph (temperature and humidity), duration of moonlight (pole-star records), duration of sunshine, rain gauge charts, and other meteorological observations. Inclusive dates: 1885-1957. These records were given to the National Weather Records Center (now National Climatic Center, NOAA) by Harvard University in 1959. Volume is 166 cubic feet.

DISPOSITION: Dispose of immediately.

* Does not include 6 2/3 cubic feet of "Old Meteorological Records" consisting mainly of journals containing weather observations with inclusive dates: 1735-1927, which are part of the Blue Hill Collection to be accessioned by NARS under Job No. NC3-27-76-1.
