This system is the primary audit documentation, project tracking and workflow management tool for the Office of Audit and Evaluation (OAE). It provides frontline project management support and oversight to OAE by tracking each project from planning to issuance of a final report or other written product. It tracks project time, expense, and other metrics to provide a summary of up-to-date information for each OAE project. The system serves as the primary tool for creating and maintaining audit/evaluation/inspection work papers and supporting documentation that OAE saves concerning particular DOC programs or operating units for a specific period. Documentation includes, but is not limited to, planning documents, data analyses, interview records, draft and final reports, memoranda, and responses by the Department or Department operating units.
