Subject : Appraisal of Job N1-167-91-1.

To : ND

Wtkaw

I am pleased to provide more information on our appraisal of Job N1-167-91-1.

The videotapes described in this appraisal job make up the third installment of National Institute of Standards and Technology documentary audiovisual materials offered to NARA. The first two jobs were accessioned by NNSM last year. Each installment includes NIST-produced informational videotapes or film; this job also includes off-air recorded interviews of NIST staff and news coverage of NIST programs.

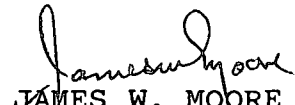

These videotapes form an important body of unique documentation of major NIST research programs, high technology initiatives, investigations made on behalf of other federal agencies, staff interviews, and public relations materials that are not available in any other form. The NIST-produced tapes were used to publicize significant agency programs, to educate the public, and to assist the news media. The broadcast news coverage tapes record unique public statements of NIST policies and programs. Together they constitute an agency-created audiovisual record of many of the major activities of NIST and, as such, have both informational and evidential value.

One of the significant research activities documented by these tapes is the development of "Space Beads," which were the first commercial products manufactured in space. Some other examples of important tapes that are included in this installment are those documenting NIST investigations into building collapses, fires, standards testing, and the NIST Automated Manufacturing Research Facility, a joint project with the Navy on the use of advanced robotics technology in manufacturing armaments.

While some of the programs on the videotapes may not be considered permanent, on the whole they make up a significant resource that NN and NI agree is of major importance. The schedule allows for the disposal during archival processing of any non-permanent materials.

These videotapes are audiovisual versions of public relations records that fit within the permanent records appraisal

guidelines listed in the Disposition of Federal Records Handbook. I recommend that you concur with this appraisal.

JAMES W. MOORE
Assistant Archivist
Office of Records Administration
