1504-20 Dedicated Access Permits

In 1993 the Restricted Access Management program was established in the Alaska Region of the NOAA Fisheries Service to implement the fixed gear Pacific halibut and sablefish Individual Fishing Quota (IFQ) Program. The Secretary of Commerce adopted the IFQ program as a management plan to replace traditional open access fisheries for Pacific halibut and sablefish in federal waters off Alaska. Since 1993, the Secretary of Commerce has adopted several programs similar to the Pacific halibut and sablefish IFQ program that limit access to the nation's marine resources in Alaska. Such programs are also being developed in other regions of the country. NOAA Fisheries calls these programs Dedicated Access Privileges (DAP).

A DAP fishery management program provides an individual fisherman, cooperative, or community the exclusive privilege of harvesting a quantity of fish. DAP programs require annual permits that authorize the use of these harvest privileges. A DAP management program may provide for such privileges and permits to be transferable amongst eligible fishermen, cooperatives and/or processors.

For persons who receive a DAP initially or by transfer: a DAP file becomes inactive five years after the date the person last held a DAP. For persons who applied to receive a DAP initially or to obtain eligibility to receive a DAP by transfer but were not approved: the file becomes inactive five years after the last date of written contact.

Disposition:

- a. Eligible application files: Cut off 5 years after permit granted. Retire to the FRC one year after cut off. Destroy 25 years after cut off.
- b. Ineligible Applicant Files: Cut off at end of calendar year in which the file is closed. Destroy 6 years later.
- c. Electronic copies created with electronic mail, oracle or other database systems, and word processing applications:
Same as hard copy files. Delete if/when recordkeeping copy has been created.

1504-21 Registered Buyer/Receiver Permits

Registered Buyer/Receiver permits are required of any person who receives IFQ halibut, CDQ halibut, IFQ sablefish, BSAI crab rationalization crab, rockfish or groundfish managed under a DAP. These permits are issued on either a three year or annual basis. These permits are not transferable. The permits are valid only for the period issued effectively closing out any certificates issued for the prior permit. The permit number issued is required for reporting the harvest or processing effort.

Disposition:

a. Paper copies: Destroy 6 years after cut off. Cut off when permit certificate expires. Retire to FRC one year after cut off. (Cut off coincides with disposition of similar permits under 1504-11, Federal Fisheries/Processor permits and High Seas Fishing Permits, which have a six year retention).

b. Electronic copies created with electronic mail, oracle or other database software, and word processing applications . Same as hardcopy files. Delete if/when recordkeeping copy has been created.
