REQUEST FOR AUTHORITY TO DISPOSE OF RECORDS—Continuation Sheet

ITEM NO.	8. DESCRIPTION OF ITEM (WITH INCLUSIVE DATES OR RETENTION PERIODS)	9. SAMPLE OR JOB NO.	10. ACTION TAKEN
	<p>(b) <u>Working Files: Coding forms - NODC prepared:</u> Non-automated data from publications or manuscript tables, are coded for digital processing. Destroyed <u>one year</u> after final listings are approved. See job number Na-167-94, disposal approved May 12, 1967.</p> <p>(c) <u>Working Files: Input Punched Cards:</u> Observed oceanographic data as reported by 59 and originators are recorded on the input punched card decks which are maintained by reference numbers assigned to each discrete batch of data. The input cards are fed into the computer which converts observed data into standard observations for entering into the digital base. Destroy <u>one year</u> after final listings of data are approved.</p>		DISPOSAL APPROVED
	<p><i>NN-171-114</i></p> <p>2. <u>Bathythermograph Data Files:</u> Temperature readings at depths taken by a bathythermograph and recorded as traces on glass slides. Data, when final, are entered into a data base on <u>magnetic tape which is permanently retained.</u></p> <p>(a) <u>Original Data:</u> Glass slides with related log sheets, the latter providing information about each observation such as date and time, related weather conditions, position, etc. Slides are superimposed upon grids and photographed. Information from the log sheets is recorded on transparent vellum which is attached to the negative print. The negatives and attached vella become the source records. Destroy <u>one year</u> after final listings are approved.</p>		DISPOSAL APPROVED
	<p>(b) <u>Coding Forms:</u> Temperature observations from the analog records are selected at specified depths and entered onto coding forms for digitization. Destruction of coding forms <u>6 months</u> after processing was authorized by job number Na 167-94, approved May 12, 1967.</p> <p>(c) <u>Input Punched Cards:</u> Data reported by originators, depths often in feet and temperature in degrees Fahrenheit, are maintained in batches by reference number. When input cards are entered into the digital file, the data are converted, when necessary to record depths by meters and</p>		DISPOSAL APPROVED
