The results are published together with methodological overview in the March *Survey of Current Business* and as an appendix to the federal budget.

This series is used to produce the quarterly (not seasonally adjusted) compilation of Federal government receipts and outlays (from the Department of Treasury) on national income and product basis and represents the foundation of the NIPA statistics that appear as part of the NIPAs published quarterly in the *Survey of Current Business*. Data from various agencies, such as social security benefit payments from the Social Security Administration, are entered into FEAR via direct data link (U.S. Treasury,) and secondary sources (selected information sent via e-mail). The data are refined, corrected, and adjusted.
