1 NTIS Digital Scientific and Technical Information (STI) Collection and Bibliographic Database

Containing over 27 million titles and bibliographic records, the NTIS Digital STI Collection and the searchable Bibliographic Database is the preeminent resource for accessing the latest unclassified scientific, technical, engineering, and business related information which results from federally-funded research activities sponsored by the United States and select foreign governments. The STI Collection of reports and publications and Database represents billions of dollars in scientific and technical research. The NTIS digital STI collection includes business and management reports, domestic and trade, general statistics, environmental and energy, health and social sciences received or collected from a variety of Federal government agencies, including Commerce, Energy, NASA, EPA, Agriculture, and other Departments and agencies. Media formats may include printed reports converted to digital formats, "born digital" scientific and technical reports, electronic databases, digital audio visual records, CD-Roms, Diskettes, Tapes and DVDs, as well as on-line downloadable data. The complete electronic file dates back to 1964. On average, NTIS has added over 60,000 new records per year to the collection and bibliographic database over the past ten years. Most records in the bibliographic database include abstracts of the STI Collection of reports and publications. Subjects covered include but are not limited to

- Administration & Management
