GEOGRAPHIC NAMES DATA BASE

The GNDB documents the official standard foreign geographic feature names approved by the BGN and maintained by the NGA. The GNDB contains information on approximately six million physical and cultural geographic features located worldwide, excluding the United States and Antarctica. The Federally recognized name of each feature described in the database is identified, and references are made to a feature's location by region, feature classification, geopolitical entity and administrative division, and geographic coordinates. The NGA provides online, public access to GNDB data through the GEOnet Names Server (GNS).

a. Source Data. Input data, including microfilm, electronic, or paper inputs.

b. Stored Data. Data stored in GNDB relational tables.

c. Documentation. Technical documentation required to operate, maintain, and use the GNDB, including systems specifications, file specifications, codebooks, record layouts, user guides and manuals, and related records.

d. GEOnet Names Server electronic data. Electronic extract data derived from the GNDB and supporting technical documentation.

a. TEMPORARY. Destroy when no longer needed for agency business or after source data has been edited for accuracy, verified, input, and stored in GNDB.

NOTE: This disposition does not apply to the Geographic Names Card Files (Item 804-13).

b. TEMPORARY. Destroy or delete data when no longer needed for agency business.

c. TEMPORARY. Destroy or delete when superseded, obsolete, or no longer needed for agency business.

d. PERMANENT. Cut off at end of calendar year every 5 years and transfer a snapshot to NARA with supporting technical documentation.

GEOGRAPHIC NAMES CARD FILES

This item covers a centralized card file of foreign place names accumulated by the U.S. Army Map Service and successor agencies, including the Defense Mapping Agency (DMA), for the period 1945 through 1995. The records consist of four-by-six-inch index cards documenting foreign place names and changes regarding particular place names over time. Each card provides information about the type of geographic feature, geographic coordinates, country information, sources of information about place names, and remarks about changes, decisions, actions, or related comments about particular place names. This card file represents the central source of primary U.S. Government information about foreign place names for the period covered. This is a non-recurring item designed to deal with legacy records, which are not being actively created or maintained in this format any longer.

Recordkeeping copy.

PERMANENT

Transfer to NARA immediately.
