| 1 | ATOMIC ENERGY DETECTION SYSTEM (AEDS) RECORDS (Table 55-17) (Applicable to Air Force Technical Applications Center only) <i>withdrawn per telephone conversation with R.P. Dwyer 2/2/90</i> Rules 1, 3, 4 and 8 . These AEDS records need permanent retention as they include scientific and technical reports, studies, plans, and supporting documentation used for reference and reevaluation of scientific results in support of national command authority requirements. As HQ AFTAC and the AEDS laboratories have the technical capabilities to evaluate raw data and calculations, the laboratories on occasion send this data to HQ AFTAC. Both organizations thus maintain and analyze these records, prepare the reports, and send copies of the reports to each other. These records are filed subjectively, volume on hand is 35 cubic feet, and annual accumulation is 3 cubic feet. | | |
| 2 | Rules 2 and 5. These AEDS records are copies of the above permanent records, thus are destroyed when no longer needed. | | |
| 3 | NOTE. We plan to offer permanent AEDS records to the National Archives when 25 years old. | | |
