|--------------|--|--------------------------|--------------------|
| 1            | SPACE DETECTION AND TRACKING SYSTEM (SPADATS)<br>RECORDS (55-8)<br>(Applicable Air Force-wide)<br><br>See attached table 55-8, rule 13, which provides for the permanent retention of tracking and impact predication (TIP) folders. Should any decaying object survive re-entry and be located, the TIP data is used in an effort to determine which specific space object it was. Also this data is used to verify the accuracy of modification to the software associated with impact prediction. This data must be permanently retained for historical purposes since there are no duplicate or related records maintained elsewhere. The TIP data generated throughout the years is irreplaceable at this date, and the only data that contains the trajectory prior to decay and the decay location as well as the decay date. | DLT<br>55-8<br>R13       |                    |
