	<p><u>CIVIL ENGINEERING RED HORSE PROGRAM RECORDS</u> <u>Table 93-2 (Applicable Air Force-wide)</u></p> <p>The purpose of this submission is to establish disposition criteria for documents created under the Rapid Engineering Deployable Heavy Operations Repair Squadrons, Engineering (RED HORSE) program. RED HORSE units provide highly mobile, self-sufficient, and rapidly deployable civil engineering capability. Their functions include heavy damage repair for restoration of Air Force-controlled facilities, heavy maintenance of air bases and remote sites, and engineering support for aircraft operations, particularly in bare base environments, during initial and sustained phases of contingency operations.</p> <p>The RED HORSE program is an innovative Air Force approach for the provision of civil engineering support and operates as an independent function. The effectiveness of their operations during the Vietnam war and other crises support in the post-war era has generated keen interest in the program. HQ USAF has primary responsibility for policy formulation while the Air Force Civil Engineering Center (AFCEC) exercises managerial control. We feel that the documents described in Rule 1 of our proposed table document a major function of the Air Force and have sufficient value for historical and research purposes to warrant permanent retention.</p>	<p>NN 170-33</p>
