This submission establishes disposition criteria for rules 6.2 and 6.3. These rules cover nondestructive inspection radiographs (NDI). Rule 6.2 was previously submitted and approved under job number NCI-AFU-79-44. The 2-year retention requirement was based on most radiographic inspections of aircraft being accomplished at 2-year intervals or less. This requirement is no longer valid. As a result of recurring and nonrecurring field level radiographic inspections and time compliance technical orders (TCTOs), aircraft radiographic inspections are now required up to four years. Failure to maintain radiographs for four years or until reinspection will result in costly reinspections when past radiographs are required for comparison with new radiographs for trend analysis or when required to verify structural integrity.
