

INACTIVE - ALL ITEMS SUPERSEDED OR OBSOLETE

Schedule Number: NC1-AFU-83-011

All items in this schedule are inactive. Items are either obsolete or have been superseded by newer NARA approved records schedules.

Description:

Item 900/1/23 was superseded by NC1-AFU-83-077 / 900/1/23.

In 1989, Air Force submitted N1-AFU-90-003 to cover all of their temporary items in AFR 12-50, Volume II, Disposition of Air Force Records (dated 1987) under a single job number. The items on this schedule are temporary. It is assumed that the remaining items on this schedule were therefore superseded by N1-AFU-90-003.

The documentation on these awards held at HQ USAF should be for permanent retention rather than documentation at installations. The new disposition in rules 24 and 25 will be the same with a slight rewording of the present disposition of rule 25. The revised disposition will allow the installations to retain the documentation as long as deemed useful. The award nominations provide excellent insight into the implementation of AF policies concerning natural resources conservation and comprehensive overviews of natural resources management methods used by AF installations at the time of the awards. The AF natural resources program encompasses about nine million acres of public land. The award nominations also treat installation landscaping, beautification, and outdoor</p> <p><i>Mass data change worksheet not required. 	<p>recreation in some detail. Therefore, they have value as records of contemporary environmental and social conditions and concerns on military installations. Retention of this documentation also preserves a record of two of the most important Air Force and Department of Defense programs. AFM 12-50, table 900-1 does not address documentation concerning the General Thomas D. White Environmental Quality Award for Overseas Installations, nor the Secretary of Defense Environmental Quality Award. Justification for permanent retention of this documentation would be similar to that for the natural resources awards insofar as it concerns important awards programs, and excellent overview of contemporary policy and methods on AF installations, and contemporary concerns with quality of life. The impact would be less with regard to stewardship of public lands. There are approximately 2 cubic feet of rule 23 on hand at HQ USAF, Directorate of Engineering and Services, Environmental Division. The annual accumulation is approximately 1/4 cubic foot. The records may be offered to National Archives in 5 years blocks when the latest document is 25 years old. The files are maintained by types of awards, then chronologically.</p>
