7. ITEM NO	8. DESCRIPTION OF ITEM (With Inclusive Dates or Retention Periods)	9. SAMPLE OR JOB NO.	10. ACTION TAKEN
	<p>Request authority for immediate disposal of the records described on the attached SF 135. These records were accumulated by the US Army Coastal Engineering Research Center, US Army Corps of Engineers, and consist of analog magnetic tape records of wave observations. The documents fall under file number 1513-03, Hydrological and Hydraulic Data Files, AR 340-18-15, and are presently listed as permanent. We intended to offer these tapes to the National Archives. However, prior coordination with Mr. Don Harrison, Machine-readable Archives Division, indicates that the records possess insufficient archival value to be accessioned into the National Archives. The records are presently stored in the Washington National Records Center.</p> <p><i>Disposition: Temporary. Upon approval of this schedule, records will be permanently withdrawn by the Coastal Engineering Research Center which will erase the data on the tapes.</i></p>		<p><i>1 item</i></p>

13. DESCRIPTION OF RECORDS WITH INCLUSIVE DATES (Show organizational component(s) if records)

The U. S. Army Corps of Engineers, Coastal Engineering Research Center.

The files listed below were originated by the Oceanography Branch, Research Division. Records are arranged by location and chronologically thereunder according to dates on which measurements were recorded, up through the last record completed by December 31, 1969.

Records consist of analog magnetic tape records of wave observations made with wave gage and the magnetic tape recorder system described in Leo, C. Williams "CERC Wave Gages", Technical Memorandum No. 50, December 1969, U. S. Army Corps of Engineers, Coastal Engineering Research Center.
