

Request for Records Disposition Authority

Records Schedule Number DAA-AU-2014-0025
Schedule Status Approved

Agency or Establishment Department of the Army
Record Group / Scheduling Group Army Undifferentiated
Records Schedule applies to Department-wide
Schedule Subject Oil Analysis Standard Inter-service System (OASIS) - RN 700-132a
Internal agency concurrences will be provided No

Background Information AR 700-132, Joint Oil Analysis Program, prescribes policies, responsibilities, and goals for the Joint Oil Analysis Program (JOAP). The Commander, U.S. Army Materiel Command (AMC) Logistics Support Activity has responsibility for managing program operations and executing the Army Oil Analysis Program. The OASIS is a software application that is used as part of an Object Relational Database Management System or Army and Navy Oil Analysis Laboratories worldwide. The OASIS receives input of oil sample information provided by customer units detailing the oil wetted components and major end item serial number and other traceable information. The inclusive dates for OASIS are from 1997 to present. All data is seamlessly transferred to the Logistics Information Warehouse (LIV). The source inputs are approved for disposition under RN 25-1kkk, Input Source Records. Output is provided to the war-fighter and decision makers in near real time via the web in the form of reports and are covered under RN 25-1lll, Information technology system administrative reports. The record number (RN) for this system is 700-132a, ACRS 700A/6+.
