

Request for Records Disposition Authority

Records Schedule Number **DAA-AU-2015-0007**
Schedule Status **Approved**

Agency or Establishment **Department of the Army**
Record Group / Scheduling Group **Army Undifferentiated**
Records Schedule applies to **Department-wide**
Schedule Subject **Corporate Management System (CMS)**
Internal agency concurrences will
be provided **No**

Background Information **AR 70-1, Army Acquisition Policy, implement the Army's acquisition policy for programs in acquisition categories (ACATs) I through III. This regulation assigns responsibilities to Army organizations in accordance with DODD 5000.01 and DODI 5000.02. The Army will apply the direction contained in DODD 5000.01 and DODI 5000.02 to all acquisition programs while streamlining and tailoring the procedures within statutory and program requirements. This regulation also specifies Army's acquisition workforce management responsibilities and defines clothing and individual equipment (CIE) acquisition responsibilities.**

The proponent of this regulation is the Assistant Secretary of the Army for Acquisition, Logistics, and Technology (ASA(ALT)). In support of AR 70-1, ASA (ALT) submits for disposition the Corporate Management System (CMS). CMS is a collaborative product data management system that provides a seamless engineering and development environment to execute, manage, and organize data related to the acquisition of new and existing weapon systems. It allows all stakeholders in the product development and sustainment lifecycle the capability to collaborate regardless of location, organizes and manages acquisition and development data for the duration of the lifecycle of the weapon system, and provides access to all stakeholders involved in the acquisition, development, and sustainment of a product from Government civilians to contractors and vendors.

The inclusive dates of CMS records are from 1995 to present.

Source input is keyed into the system by users and is approved for disposition under RN 25-1kkk/400B (0-6). System documentation

includes record layouts, specifications, and code books which are covered under RN 25-1mmm(400B (0-6).

Output: The CMS System is a web-based application using Mandatory Access Control whereby a System Administrator determines access to the system and the data/documents stored within. Output is in the form of web pages containing data about documents (metadata), and other tracking data related to Net Training, Equipment Tracking, Asset Management, and System Communications that the end user requests through their web browser. Documents and their metadata that a user has sufficient permissions for are returned via the search results and can be downloaded. Automated system administrative outputs and reports use RN 25-jjjj/400B, Information Technology.
