

## Request for Records Disposition Authority

Records Schedule Number DAA-AU-2016-0026  
Schedule Status Approved  
  
Agency or Establishment Department of the Army  
Record Group / Scheduling Group Army Undifferentiated  
Records Schedule applies to Department-wide  
Schedule Subject Logistics Information Warehouse  
Internal agency concurrences will be provided No

Background Information AR 710-3, Inventory Management Asset and Transaction Reporting System. The proponent of this regulation is the DCS, G-4. This regulation sets policy and assigns responsibilities for operation and maintenance of the Department of the Army (DA) asset and transaction reporting systems; sets standard methods for reporting major and selected secondary item assets. These standard methods will incorporate in-transit loss accounting techniques and furnish functional managers with a common base of information for logistics management; prescribes procedures, codes, and formats for interfacing with other ongoing asset reporting subsystems; sets procedures for interfacing with data maintained in The Army Authorization Documents System (TAADS) and the Unit Identification System (UIS); prescribes design features (for example, codes, formats, and procedures) that are adaptable to systems planned for development by Department of Defense (DOD) or DA activities and elements.

AMC, U.S. Army Logistics Support Activity, directed by the Secretary of the Army, created a repository for Army Logistics data that provides a single, common location for all Army materiel stakeholders to access, acquire and deliver data and information for managing Army materiel. LIW provides a single, common location for all Army materiel stakeholders to access, acquire, and deliver data and information for managing Army materiel. It enables the authoritative data sourcing to multiple trading partners in materiel enterprise, covering acquisition, stock record and property book assets, authorizations, finance, force, item, in-transit visibility, maintenance and supply source data feeds.

This data will be used in support of materiel sourcing and distribution and other Materiel Enterprise missions. LIW enables visibility of business intelligence and resulting metrics for critical logistics

components enabling enterprise-level analytics to be performed in support of the equipping mission within the Army's Force Generation (ARFORGEN) processes. LIW supports the tenants of Mission Command by logistically empowering the Commander to successfully integrate and synchronize logistics information with warfighter functions in time and space to maximize potential for mission success. LIW provides the data and custom business intelligence environment to enable Command-specific analysis and presentation of COTS BI displays to satisfy unique ACOM management requirements.

Source input is data entry and database records (generated via the Army's daily Logistics Business Processes and the systems/ personnel that support these processes) and is approved for disposition under RN 25-1kkk/400B(0-6). System documentation includes record layouts, specifications, and code books which are covered under RN 25-1mmm/400B(0-6). Output includes reports, logistics database records for consumption by other Army Equipment Release Priority System and Logistics Support Activity trading partners. Automation system administration outputs and reports use RN 25-1jjjj/400B, Information Technology. The inclusive dates are 1994 to present.
