10	<p>FN: 11-9p Title: Decommissioning records Authority: Privacy Act: Not applicable. Description: Information about the use and storage of radioactive material that is important to the decommissioning of a facility in an identified location. This includes all information required by 10 CFR 30.35(g) (3) for NRC-licensed material and as similarly applied for radioactive material held under authority of Army radiation authorizations. Disposition: Code KE6: Event is after the site is released for unrestricted use. Keep in CFA until event occurs and then until no longer needed for conducting business, but not longer than 6 years after the event, then destroy.</p>		
11	<p>Electronic copies created on electronic mail and word processing systems will be deleted after recordkeeping copy has been produced and when no longer needed for reference, updating, revision, or dissemination.</p> <p>Item 2. NRC is very careful about terminating licenses. When the NRC terminates a license, you can be sure that everything has been completed. In addition, the NRC gets copies of the most important of these documents and keeps them "forever". So if anyone ever needs one of them, they can get them from the NRC.</p> <p>Item 8. Mostly has to do with x-ray rooms in hospitals and industrial x-ray facilities and not NRC radioactive material facilities. No radioactive contamination, only shielding, design, etc.</p>
