	Advanced Warfighting Simulation AR 350-1 Background. The purpose of the Advanced Warfighting Simulation is analysis and experimentation of training and battle command exercises. AWARS input consists of performance data, scenario description data and behaviors entered for scenario integration. Performance estimates data is entered into AWARS from the Army Materiel Systems Analysis Activity (AMSAA) database. When a study is completed the raw data generated by the system is deleted. The application produces large quantities of statistically generated data which are used for trend analysis. Information in the system dates from May 2002. RN: 350-1hh Title: Advanced Warfighting Simulation (AWARS) Master File Authority: TBD PA: TBD Description. Documents are experiments, studies, exercises, training demonstrations, scenario descriptions, and performance estimates and behavior data. Scenario runs result in printouts describing the actions produced by the scenario entities; logger output files, and trend analysis data. Disposition: KN. Keep until no longer needed for conducting business, but not longer than 6 years, then delete.
