The information collected serves as a data repository used for research purposes, security background investigations, and providing statistical analysis and reports to program managers and decision makers from the installation substance abuse program manager to DoD. DAMIS data is used to identify trends, judge the magnitude of drug and alcohol abuse, and to measure the effectiveness of drug and alcohol prevention efforts in the Army.</p> <p>Note: Use record number (RN) 25-1kkk for source/input records, RN 25-111 for automated system administrative reports, <del>RN 25-1nnn</del> for system documentation and specification, and RN 25-1nnn for backup files.</p> <p>RN 600-85h<br/>Title Drug and Alcohol Management Information System (DAMIS) Master File<br/>Authority TBD<br/>PA TBD</p> <p>Description Drug testing data, substance abuse treatment data, financial data, medical review officer data, and demographic information such as age, grade, MOS, etc on all Soldiers that have been drug tested or screened for substance abuse. System contains records from Sep 1988 until present. One database record is created for each drug test requested and/or substance abuse screening conducted (DA Form 4465-R). The primary key to the data is an eighteen character field called the individual system sequence number. Drug testing specimen data contains information on the specimen, results of testing, Medical Review evaluation if required, and a few demographics on the Soldier that was tested such as age, grade, etc at the time of the drug test. Patient substance abuse screening and treatment records contain information about the nature of the screening, enrollment in the substance abuse program, treatment outcomes, etc.</p> | GRS 11a (2)                      | 11/17/09<br>                    |
