**SECTION III – APPRAISER'S COMMENTS**

This job, submitted by Army, changes the retention period of cardiac catheterization x-rays from 5 to 7 years and also modifies the Army file number for x-rays to exclude film pertaining to civilian employees, which is currently frozen pending the development by OPM of an employee medical file system (EMFS). Since this job merely increases the retention period for records already approved for disposal, NNM concurrence is not needed nor is Register publication
