-------------	---	----------------------	--------------------------------

1	System Safety Historical Files - FN 385-16c		
	Background: The proponent for AR 385-16, System Safety Engineering and Management, has identified a need for the retention of historical records on system safety beyond the current 5 year retention period in some cases. We propose to change the file number disposition instructions as follows: FN 385-16c, System safety historical files. Authority: Description: Information accumulated by offices responsible for collecting historical safety problem area information of a recurring nature. Included are "lessons learned" from a particular system or several different systems; special projects, studies, or analyses of accident data; information on malfunctions and incidents; and similar information. Disposition: Destroy when no longer needed for current operations, <i>5 years old or when</i> <i>whichever is later.</i>		

change made with Army concurrence 8/15/90
