Water Supply Storage Space Contract Files, FN 1519-16.

Description - Water supply storage space contract files. Contracts between the US Government and states or local interests, entered into under the provisions of Public Law 85-500, to include storage space in reservoirs to impound water for their use. Included are long term contracts, which continue in full force and effect for the physical life of the project, and short term contracts, which provide for temporary needs, and related documents.

Disposition - Long term contracts: Destroy 6 years after removal of the structure, abandonment of project, or after the US Government discontinues operation of the project.

Short term contracts: Destroy 6 years after termination of the contract.

Background - We concur in your position that the long term contracts possess insufficient archival value to warrant permanent retention.
