	<p>1. Organizations not converting the data to microform: <u>Permanent</u>. Offer to NARS when 20 years old.</p> <p>2. Organizations converting the data to microform:</p> <p>(a) Original documents: Temporary. Destroy after verification that the microform meets prescribed quality standards and that the microform is an acceptable substitute for the original documents. (Filmed documents may be retired to the Washington National Records Center pending certification of the film as meeting durability standards for permanent records. Such textual records that have been filmed will be scheduled "contingent" until film is certified. If film cannot be certified, these textual records are automatically rescheduled as permanent and the film as temporary.)</p> <p>(b) Record copy of microform certified to meet durability standards for archival records and one duplicate copy: <u>Permanent</u>. Retire record copy from use after filming is completed, or after one year, whichever is sooner. Offer to NARS in 5 year blocks when 20 - 25 years old. (If the film does not meet standards yet to be established for non-silver based updateable microform systems, it is automatically rescheduled as temporary and the textual records from which the film is produced are permanent).</p> <p>(c) Other microform copies. Temporary. Destroy when no longer needed for current operations.</p> <p><u>c.</u> Documents providing an index to these central files, in either manual or machine-readable format.</p> <p>1. Manual indexes:</p> <p>(a) Indexes relating to the routine non-policy files described in a above: Destroy after 10 years.</p> <p>(b) Indexes relating to the policy portion of the files described in b above: <u>Permanent</u>. Retire with the corresponding annual block of files in b above and offer to NARS with the files to which they relate.</p> <p>(c) Other copies of the index: Destroy when no longer needed for current operations.</p>

DESCRIPTION OF MICROFILM SYSTEM

This microform system applies to Office of the Secretary of the Army, Office of the Chief of Staff Army, and Headquarters Department of the Army Staff Agencies. It has already been implemented in the following agencies:

- Office of the Secretary of the Army
- Office of the Chief of Staff Army
- Deputy Chief of Staff for Personnel
- Deputy Chief of Staff for Operations and Plans
- Deputy Chief of Staff for Logistics
- Comptroller of the Army
- Assistant Chief of Staff for Intelligence (*)
- Deputy Chief of Staff for Research, Development, and Acquisition (*)
- National Guard Bureau (*)

The system is to also be implemented in the following agencies by the end of fiscal year 1982:

- The Adjutant General's Office
- The Surgeon General's Office
- Chief, Army Reserve
- The Judge Advocate General's Office
- The Inspector General's Office
- The Chief of Chaplains Office
- The Army Audit Agency
- Office of the Chief of Engineers

Documents are converted to updateable microfiche in the mailroom of each agency operating the system. This is accomplished when an incoming document is first received. Responses to an incoming document are filmed on the same master microfiche containing images of the incoming document. This is accomplished when the response flows out through the mailroom. At the same time that the documents are converted to microfiche, information identifying the action is entered into the machine-readable index.

There are presently two types of updateable microform technology used in the system - (1) A. B. Dick System 200, and (2) Bell & Howell Microx System. The agencies listed above that have implemented the system and that are also using the Bell & Howell Microx System are identified with an asterisk (*). Those not so marked are using the A. B. Dick System 200.
