SUMMARY

The Department of the Army requests permission to revise disposition standards for harbor line approval files, which are presently unscheduled and retired under TAFFS 1522-04. For original records in this series and annotated copies containing original information, the recommended disposition is permanent. For unannotated copies of original tracings, the Army recommends destruction when no longer needed for reference use.

NARA should approve this job. These files have obvious permanent retention value. They provide important cartographic information and interpretations to such professional researchers as historians, geographers, geologists, archaeologists, urban planners, ecologists, and lawyers. Records will be offered to NARA when 20 years old or when no longer needed for administrative purposes, whichever is later. This allows adequate time to exhaust current use for a series whose older files are frequently active.

RECOMMENDATION

1. APPROVED FOR DISPOSAL. The records described under all items of the schedule, except those that may be listed in blocks 2, 3, and 4 of this section, are disposable because they do not, or will not after the lapse of the period specified, have sufficient administrative, legal, research, or other value to warrant their continued preservation by the Government.
2. APPROVED FOR PERMANENT RETENTION. The records described under the following item or items have been appraised by the National Archives and Records Administration (NARA) and are determined to have sufficient historical or other value to warrant their continued preservation by the United States Government. The agency will offer these records to the National Archives as specified.
3. DISPOSITION NOT APPROVED. The records described under the following item or items are not approved for disposition.
4. WITHDRAWN. The records described under the following item or items have been withdrawn at the request of the agency and/or NARA.
