Sequence Number			
1	<p>Total Force Structure Management System (TFSMS) TFSMS has been the single authoritative source for Marine Corps force structure and equipment requirement data from 2005 ongoing and serves as a business engine for the Total Force Structure Process. Within TFSMS are web-based tools to support force structure planning, decision making, reporting, and querying. The automated workflow capability allows Marine Corps organizations to request changes via on-line electronic forms called Table of Organization and Equipment Change Requests (TOECRs). These change forms are automatically routed through pre-designated approval chains to the Deputy Commandant, Combat Development and Integration (DC, CD&I), Total Force Structure Division (TFSD). The workflow module tracks the status and progress on all pending change requests. Through automated and ad hoc reporting capabilities, TFSMS supports any queries or data exportation to other Marine Corps operational systems with respect to past, present, or future Marine Corps force structure and equipment requirements.</p>
