

INACTIVE - ALL ITEMS SUPERSEDED OR OBSOLETE

Schedule Number: NC2-127-85-01

This schedule provided disposal authority for records previously accessioned into the holdings of the National Archives.

Per NARA Directive 1540 – *Reappraisal and Deaccessioning of Archival Federal Records*:

An internal disposal is the permanent removal of a discrete set of an accessioned series of records from NARA's physical and legal custody, from any number of physical locations (up to and including all physical locations), because they have been reappraised as temporary, without affecting the existing disposition authority for any remaining records. This removal can result in the records being destroyed, permanently returned to an agency, or donated to another organization.

It is assumed that the schedule was implemented after the record scheduling process was completed (concurrence by the agency, notice to the public via the Federal Register, and approval by the Archivist of the United States).

Date Reported: 11/18/2020

CRITERIA FOR DISPOSAL OF US NAVY STOCK FOOTAGE

Select for disposal footage which contains primarily marginal subject matter:

1. Scenic shots without any documentary value as to time, place, or historical condition.
2. Change of command ceremonies ashore below 4-star (Admiral), and afloat below 3-star (Vice Admiral)
3. Outtakes (supplements) to Navy motion pictures (MN's) that do not document combat operations.
- 3a. Routine ship activities; only a sampling is needed.
4. Sports activities.
5. Most launchings, christenings, or commissionings of ships except those of aircraft carriers (CV), battleships (BB), atomic submarines (SSN) and the first of the class of every other ship of the line (submarines, cruisers, destroyers). Retain ceremonies attended by the President or of ships famous in naval history (i.e. U.S.S. Sullivan). Consult the volumes of the Dictionary of American Fighting Ships for guidance.
6. Footage that substantially duplicates footage already in our holdings.
7. Footage originated by the Army or Air Force. The Navy records contain original Marine Corps and Coast Guard footage.
8. Routine or recurring peacetime operations or exercises. Consult with the Navy's Operations Archives to decide what is routine.
9. Duplicative or repetitive coverage of routine activities aboard ship and ashore.
10. Awards ceremonies except for the Medal of Honor.
11. Out of focus or other poor photography except combat operations.
12. Routine training and testing or demonstrations of equipment and weapons except for the introduction of new weapons or technology.
13. Entertainment for sailors unless the scenes include well known personalities. Navy has on occasion spliced some items together, so that there may be 300 feet of a ~~base~~ baseball game and 100 feet of the Marines storming a beach in the Pacific. Keep the entire roll.
14. If the films do not show significant operations, activities, events, personalities, etc., they may be likely candidates for disposal, unless it is necessary to keep them because they pictorially document the general appearance or features of a ship, aircraft, or other major piece of military equipment or technology. No more than one film for each subject should be retained on this basis alone provide the selected film has substantial coverage consisting of at least several hundred feet of good-to-excellent photography.
