Sequence Number											
1	<p>Investigation and Resolutions Case Management System (IRCMS) The Investigations and Resolutions Case Management System (IRCMS) is the Department of Defense's enterprise-wide, web-based tracking application that will provide an effective mechanism to manage and track EEO complaints submitted for investigation. It will provide a comprehensive repository for case information, electronic file management, and a full-featured report generation module to meet a variety of reporting requirements and program evaluation needs. IRCMS receives Personally Identifiable Information (PII) from the customers when they enter information into the fields in the database. IRCMS includes the capability to enter and collect data, manage case deadlines, generate reports and metrics as required, and facilitate case management and program improvement decision-making within DoD. The information is also used to respond to Congressional and for performance metrics for employees. The customers receive the information, to include PII, from the Formal Complaint and related documentation provided by Complainant and Agency. IRCMS will interact with I-Complaints (a web-based EEO complaint tracking and reporting system used by many EEO offices) and the information will populate from the I-Complaints system. PRIMARY INPUTS: Include but are not limited to: Identifying information: including name, personal address, work telephone number, alternate telephone number, and Complainant's email address and complaint basis. OUTPUTS: Routine and Ad hoc reports will be generated by registered users.</p>
