SF 115 Record Schedules

BACKGROUND: The Defense Acquisition Regulation Systems Directorate (DARS) has developed the Shared Transformation Acquisition Regulations System (STARS), which will provide and integrate the tools to move the development, implementation, publication, and communication of laws, policies, and needed changes in the Federal Acquisition Regulation (FAR) and DoD FAR Supplement (DFARS). STARS will facilitate acquisition rule-making by transforming a lengthy, paper-based process to an electronic web-based process with “user-friendly” capability that facilitates collaboration within DoD and effective communication among all the stakeholders (DoD and GSA) in the acquisition process. STARS will include a knowledge management structure to enable effective document management and to permit open dissemination of information to the world-wide acquisition community. This integrated IT solution will also provide document and records management of current and historical acquisition regulations (1948 – Present) and guidance for the FAR and DFARS with all supporting materials and files

The input source records are forms, case files, spreadsheets, MS-Word documents, and other electronically generated documents, which will be destroyed per GRS 20, items 2a, b, c, and d, as applicable. An electronic case management folder will be created for each case (record) comprised of general information, related documents, collaboration tools (chat rooms, voice, and video), workflow, and public comments received. The outputs will be in PDF, HTML, and MS-Word documents. The STARS case files will be sent to a records management application (MDY’s File Surf) and are previously scheduled under AI 15, FN 1202-06 (NC1-330-77-11), as permanent. Since the information will be transferred into a RMA, the system documentation will be covered by GRS 20, items 9 and 11a.
