	<p>DEFENSE CASE RECORD MANAGEMENT SYSTEM (DCRMS) BACKGROUND: The Defense Case Record Management System (DCRMS) is a web-enabled management tool used by the Sexual Assault Response Coordinators (SARCs) and/or Victim Advocates (VAs) of the Department's Sexual Assault Prevention and Response (SAPR) programs at the operational level. DCRMS is a stand alone system that allows the SARCs and VAs to manage the cases by tracking the service delivery, law enforcement or legal involvement, care of victims, and prosecution of offenders, as applicable, in order to assist the Military Services with statutory and regulatory reporting requirements on victim service provisions and restricted reports. It tracks the following: unrestricted and restricted reports of sexual assault; the medical and advocacy services provided to victims; and the case management actions of the first response groups (SARCs, VAs, health care providers, law enforcement and investigators, judge advocates, chaplains) from initial report to final disposition. Case-level information (personal identifiers of any kind) is only available to the SARC and VA, management levels above see only aggregate data with no personal identifiers. Adhoc reports containing demographic data, with personal identifiers removed, can be included in reports used by agency officials and DoD Components to manage programs and answer programmatic questions. DoD will not be creating annual reports from DCRMS, it will always receive data directly from the Military Services. Data is entered by the SARC and no mandatory reports are produced by the system. Adhoc reports are covered under GRS 20, Item 16, finding aids and indexes are scheduled under GRS 20 Item 9, and system documentation is scheduled under GRS 20, Item 11(1).</p>
