OFFICE OF THE UNDER SECRETARY OF DEFENSE FOR PERSONNEL & READINESS (OUSDP&R), ASSISTANT SECRETARY OF DEFENSE (ASD) HEALTH AFFAIRS (HA), TRICARE MANAGEMENT ACTIVITY (TMA)
TRICARE LOGISTICS SYSTEM BACKGROUND

The Defense Medical Logistics Standard Support (DMLSS) Program, co-sponsored by the ASD (HA) and the Deputy USD (Logistics and Materiel Readiness), is a partnership involving the wholesale medical logistics, medical information management, medical information technology, and user communities. DMLSS' mission is to improve responsiveness of medical logistics support. The DMLSS Program accomplishes this by implementing business process innovations that increase the effectiveness of medical logistics support and reduce cost. The DMLSS automated information system is the standard DoD medical logistics system enabling health care providers to deliver cost-effective, state-of-the-art healthcare to patients world-wide. DMLSS provides automation support of re-engineered medical logistics business practices and delivers a comprehensive suite of materiel management, equipment management, and facilities management information systems/applications as well as a forward logistics capability using and providing improved a web-based interface. Only DMLSS or subsequent system data maintained on centralized servers at military treatment facilities under TMA worldwide are authorized under this disposition.

Input includes data from electronic Information systems internal or external to TMA (Army, Navy, Marine Corps, Air Force, Joint Chiefs of Staff, General Services Administration, Defense Logistics Agency, Defense Finance and Accounting Service, and USD (AT&L) (Defense Property Accountability System). DMLSS sends data as output to external electronic information systems. Other systems do not access the DMLSS application or data directly. Data is sent to and received from other systems via various interfaces. DMLSS users can run queries and print or view reports from their various military treatment facilities. Personnel at Military Treatment Facilities do not generate outputs. Outputs are covered under GRS 20, Items 6 and 7. System documentation is covered under GRS 20, Item 11a(1).

ITEM 1 Defense Medical Logistics Support System (DMLSS) Medical Logistics Master Files
