Background: The ID dockets and supporting forms were previously scheduled separately, even though the data collections are directly related to the application and its approval. The supporting forms are used by FERC staff to inquire and determine whether public or private interests will be adversely affected by the holding of these positions. In addition, due to the length of time some corporate officials hold high level positions, FERC has a business need to retain all of the supporting records for monitoring and oversight purposes for a longer period of time, rather than the short-term as previously thought.

The data is used to monitor what positions electric industry officers and directors hold in organizations that do business with each other, and allows the Commission to monitor and assess the possibility of an officer having a conflict of interest which harms public or private interests.

ID docket numbers are obtained by applying with the Commission (application submitted under Form 520) for approval to hold an interlocking position. Commission approval must be granted prior to holding certain interlocking positions.

The annual report (Form 561) allows the Commission to routinely review public utility officer and/or director interlocking positions, including those positions not requiring a Part 45 (Form 520 and informational report) application, but that still require oversight under the Federal Power Act, for any position of possible impropriety.

The report of utility's twenty largest purchasers (Form 566) is submitted by public utilities identifying its largest purchases of electric energy, measured in kilowatt hours sold, for purposes other than resale.

The notice of change is a supplemental filing that informs the Commission of an applicant's resignation, withdrawal, or failure of re-election in appointment, or any other material change.
