## DOE SF-115, ITEM 7, CONTINUATION SHEET

### U.S. Department of Energy (DOE) Licensing Support Network (LSN) Collection

As a party to the Nuclear Regulatory Commission (NRC) proceeding regarding DOE's application for a license to construct a repository at Yucca Mountain for disposal of spent nuclear fuel and high-level nuclear waste, DOE is required, in accordance with 10 CFR Part 2, Subchapter J (§2 1003(a)), to identify, collect, and make available electronically all of its "documentary material" as fully defined in 10 CFR 2.1001. In summary terms, documentary material generally consists of

- Any information on which the party intends to rely and/or cite in support of its position in the proceedings,
- Any information relevant to, but that does not support the party's position and
- All reports of studies relevant to both the license application and the issues set forth in NRC Regulatory Guide 3.69, *Topical Guidelines for the Licensing Support Network*.

#### DOE LSN Collection

DOE's records that have been determined to be documentary material have been processed into an electronic collection of records maintained separately from other DOE records systems, including the source records system for such records, and placed in the DOE LSN Collection and maintained as the DOE LSN Collection.

The DOE LSN Collection contains the following for each imageable, non-privileged document therein: (1) a bibliographic header, (2) a text file containing searchable text created from an optical character recognition process; and, (3) one or more electronic images comprising each such document (unless the document could either not be imaged or certain privileges are asserted that restrict creating and disclosing an electronic image).

For privileged documents and those documents that could not be imaged, there is a header only. The schedule for this SF-115 will also apply to these privileged and non-imageable documents and to OCRWM Employee Concern Program documents that are documentary material, all of the foregoing being part of the DOE LSN Collection.

DOE Plans to periodically test, maintain, and update, as necessary, the media and format of the DOE LSN Collection, as required, to maintain accessibility during the retention period.

Disposition. **PERMANENT.** Close file (cut off) at termination of NRC licensing proceeding. Transfer file to the National Archives.

**NOTE:** For purposes of this SF-115, "termination" means a final, non-appealable order terminating the licensing proceeding for a geologic repository at Yucca Mountain.
