      1. Environmental Contamination Measurement Records indicating presence and amount of contaminating materials (including radioactive materials) in samples of air, water, earth, biological (animal and vegetation) and special materials from onsite and offsite locations. Data gathered to measure residual contamination of soil and ground water with long-lived radioactive or toxic substances at or near DOE sites. This material is presently scheduled as permanent by DOE Order 1324.2A, Schedule 1, Item 8(f). DOE requests authority from the National Archives and Records Administration (NARA) to change the disposition instructions for these records, as follows:

      a. Record copy. PERMANENT. Microfilm in accordance with 36 CFR part 1230.14 and 36 CFR part 1324.4. Transfer original microfilm along with diazo copy to the National Archives and Records Administration after microfilming has been inspected and verified. (NOTE: At the time of transfer of film, appropriate code sheets and finding aid will also be transferred.)

      b. Microfilm reference copy. TEMPORARY. Destroy when no longer needed by the Department of Energy.

      c. Paper records. TEMPORARY. Destroy after microfilming is inspected and verified for accuracy in accordance with 36 CFR part 1230.22.
