1.3

Food Applications Regulatory Management System (FARM).

FARM is an electronic information management system designed to support electronic processing, assignment, notification, review, maintenance and reporting for food ingredients submissions. It provides analytical and search tools to manage food and color additive petitions, notifications, consultations, product master lists, New Dietary Ingredient (NDI) notices, as well as other Office of Nutrition Labeling and Dietary Supplement documents. It also provides analytical and search tools to manage Food Allergen Labeling & Consumer Protection Act (FALCPA) petitions to support safety reviews, evaluations and decisions. It supports electronic submissions, FOI requests and communications disclosing information to industry and consumers. Certain records contain trade secret and confidential commercial information that may not be publicly released, disclosure is subject to the Freedom of Information Act, the Trade Secrets Act, the Privacy Act, and restrictions in other statutes and FDA's implementing regulations.

1.3.1

FARM: Input Records.

Includes data from industry submissions of: premarket consultations, petitions, and notifications; Threshold of Regulation (TOR) letters, and precedent files with substantial historical value, as well as other related records such as FOI requests and general correspondence from industry and others. Includes data from both electronic submissions directly entered into the system and paper submissions scanned into the system.

GRS 20,
Item 2a4

For precedent files, apply disposition authorized for that series.

Disposition: TEMPORARY.

Destroy after the information has been converted to an electronic medium and verified, when no longer needed for legal or audit purposes.

1.3.2

FARM: Data Files.

Includes records electronically created or transmitted, images and related data fields taken from the following records, but not limited to.

**Supersedes
NC1-88-84-3
Items 1, 2, 5, 6, 7,
and 8**

New Protein Consultations (NPC):

Includes records submitted by developers of new proteins intended for food use. Records provide information regarding the potential toxicity or allergenicity of the proteins, as well as related records.

Premarket Notification Consultations (PNC):

Includes materials generated during interactions between CFSAN and industry prior to or related to submission of a Food Contact Notification (FCN), as well as related records.

Food Additive Petitions (FAP):

Includes formal requests for food additive regulations received from producers under 21 CFR Part 171 to permit inclusion of additives in food products. Petition includes name of additive, chemical identity of additive, composition of additive, statement of proposed use, labeling, data on effects of additive, additive detection analytical methodology and additive safety investigation reports. Also includes all internal documentation supporting regulation, rejection, or denial of petition, as well as related records.

Color Additive and Diluent Petitions:

Includes formal requests for color additive or diluent regulations received from producers under 21 CFR Part 71 to permit inclusion of color additives or diluents in foods, drugs, devices, or cosmetics. Petition includes name of additive, chemical identity of additive, composition of additive, statement of proposed use, labeling, data on effects of additive, additive detection analytical methodology and additive safety investigation reports. Also includes all internal documentation supporting regulation, rejection, or denial of petition, as well as related records.

GRAS Petitions (GRP):

Includes formal requests from producers for affirmation that particular substances are Generally Recognized as Safe (GRAS) for use in food under 21 CFR 170.35. Also contains notification of FDA approval or denial, as well as supporting documentation.

GRAS Notifications (GRN):

Includes requests for GRAS exemptions from producers, as well as related records.

Food Contact Notifications (FCN):

In October 1999, notifications replaced food additive petitions as formal premarket requests for the use of food contact substances such as packaging material. Notifications become effective 120 days after FDA receipt of FCN unless FDA objects to FCN. Records include notifications and FDA responses, as well as other related records.

Biotechnology Notification Files (BNF):

Includes materials collected in consultation with industry to identify and discuss relevant safety, nutritional or other regulatory issues regarding genetically modified foods. Also includes summaries of scientific and regulatory assessments of bio-engineered food, as well as agency responses to requests

Threshold of Regulation Letter (TOR):

Includes requests submitted by industry in accordance with 21 CFR 170.39 for exemption from food additive regulations.

Food Additive Master File (FMF):

Includes supporting materials from producers of food additives which may contain one or more additives. Includes safety and efficacy test results, protocols, and correspondence among producers, third parties, and FDA. May include advisory opinions, data reports, and evaluation results.

Color Additive and Diluent Master File (CMF):

Includes supporting materials from producers of color additives and diluents, which may contain one or more color additives or diluents. Includes safety and efficacy test results, protocols, and correspondence among producers, third parties, and FDA

Disposition: TEMPORARY.

Cutoff at the end of the calendar year after final action is completed or product is withdrawn from the market, whichever is later. Delete/destroy when no longer needed for business or regulatory purposes, or 30 years after cutoff, whichever is latest.
