	<p><u>NINCDS COLLABORATIVE PERINATAL PROJECT</u></p> <p>The NINCDS COLLABORATIVE PERINATAL PROJECT (NCP) was a longitudinal, multidisciplinary research effort supported by the Developmental Neurology Branch, Neurological Disorders Program of the National Institute of Neurological and Communicative Disorders and Stroke (NINCDS). The NCP sought leads to the etiologies of the developmental disorders of childhood --- such as cerebral palsy and mental retardation --- through studies which relate the events and conditions of pregnancy, labor and delivery to the neurological and mental status of the children of these pregnancies as the child grows and develops.</p> <p>The NCP began in 1958 and data collection ended in 1974. Data were collected on over 60,000 women and their children to eight years of age.</p> <p>Analyses, reports and other end products of the NCP are already designated as permanent records under the authority of the NIH Records Control Schedule, item 3000-G-4, <u>Appendix B-361.</u></p>

1.	<p>The records series described in items 1 and 2 below constitute an unique resource for biomedical and behavioral research. The data are subject to the Privacy Act. A notice for this system of records, 09-25-0016, is attached.</p> <p><u>Original Examination Records (Microfilm)</u></p> <p>Case files on over 60,000 women during pregnancy and on their children to eight years of age. Each case file contains demographic, medical and physical data concerning a woman and her offspring. Each case contains approximately 270 pages.</p> <p>These records have been microfilmed on 16 mm. roll film according to the attached specifications. The total file is contained on 8,000 rolls of film. The file is divided into 12 segments corresponding to the 12 institutions which contributed to the study. Case numbers are blocked according to institution and cases are filmed sequentially by number. Each roll of film begins with the following identifying information: (1) number of cases and inclusive case numbers on the roll, (2) identification of the study and the sponsoring agency organization. The total volume of microfilm is 142.5 cu. ft.</p> <p>The microfilm was produced during normal operations of the NINCDS. Care has been taken to insure that the microfilm is a complete and accurate copy of the original records. The microfilm was produced in accordance with the standards of FPMR 101-11.506-1(a)(1) and will be stored under conditions adhering to 101-11.507 and 508. The first inspection under 101-11.507-2 will be</p> <p>Disposition: PERMANENT. Offer silver halide master and one copy of microfilm to the National Archives, <del>on completion of filming and satisfactory testing of the film.</del> The records will be offered to the National Archives at a date agreeable to both the National Archives and Records Service and the National Institutes of Health. (This amendment was coordinated with the agency's records officer on July 29, 1983.) <i>JK</i></p>	June 1984.	<i>JK 7/4/83</i>
