1	<p><u>Early AIDS Epidemic Charts</u></p> <p>Records which document initial tracking of non-risk group HIV infection due to contaminated blood transfusion. The charts gather information about blood donors, blood recipients, and laboratory test results. The records cover the period from 1980 through 1983. They demonstrate the initial methodology used to document the transmission of HIV/AIDS through contaminated blood. The charts are beginning to deteriorate due to inadequate storage, and require preservation work. The release of these records could reveal the identities of persons infected with HIV/AIDS, therefore, an access agreement between the CDC and the National Archives will be required.*</p> <p><u>Disposition</u></p> <p>PERMANENT. Transfer to the National Archives immediately.</p> <p><i>Copies sent to Agency, NIA, NSX (u) 5/18/94</i></p>
