Attachment to SF-115, AHRQ Request for Records Disposition Authority for Electronic Records—PSNet and Web M&M

The Center for Quality Improvement and Patient Safety maintains a database and content management system to support the AHRQ Patient Safety Network (PSNet) and Web M&M (Morbidity and Mortality Rounds on the Web) websites. Both sites are administrated using the same system, Web M&M is directly related to and is a subset of PSNet.

(Note: PSNet and Web M&M web content will be scheduled separately.)

1 AHRQ Patient Safety Network (PSNet) Database

The PSNet Database is a relational database accessible to the public via the PSNet website. It provides access to a selection of resources relevant to the patient safety community. These resources come in a variety of formats, including literature, research, tools, and web site citations.

- a *Master file* Contains citations, abstracts, subject index, and links to resources from external organizations focused on patient safety. Resources include journal articles, newsletters, a glossary of medical terms, and legislation.

Disposition: TEMPORARY. Cut off at the end of the calendar year when resource is published or content is placed in the system. Delete 5 years after cutoff or when no longer needed for administrative purposes, whichever is later.

- b *Master file—Patient Safety Primers* brief summaries and reviews of linked articles compiled by PSNet editors.

Disposition: TEMPORARY. Delete or destroy when superseded or obsolete.

2 AHRQ Web-based Morbidity and Mortality Rounds (Web M&M)

- a *Master file* Contains copies of articles on cases and commentaries discussing specific examples of patient safety, a case archive of case descriptions from a variety of healthcare fields, audio recordings and transcriptions of recordings with medical professionals, registration information for the submission of case information, registration information for the management of newsletter subscriptions, registration information to earn continuing education credits, a glossary of terms used in medical error and patient safety literature, and an alphabetical topic index with links to copies of case studies and commentaries.

Disposition: TEMPORARY. Cut off at end of calendar year when resource is published or content is placed in the system. Delete 5 years after cutoff or when no longer needed for administrative purposes, whichever is later.
